ApproveHub

EVERYONE

APP

How an approval flows

WEB

From upload to final document, with every mark landing where the requester placed it.

- **Sequential routing**
- **Marks appear after approval**
- **Admin shapes the hierarchy**

Admin layer

Builds the hierarchy per institution: branches, designations, people.

Can grant hierarchy-management access to anyone, and withdraw it.

Sees every approval in the audit log and sets rules (sequential, PIN, expiry).

ApproveHub

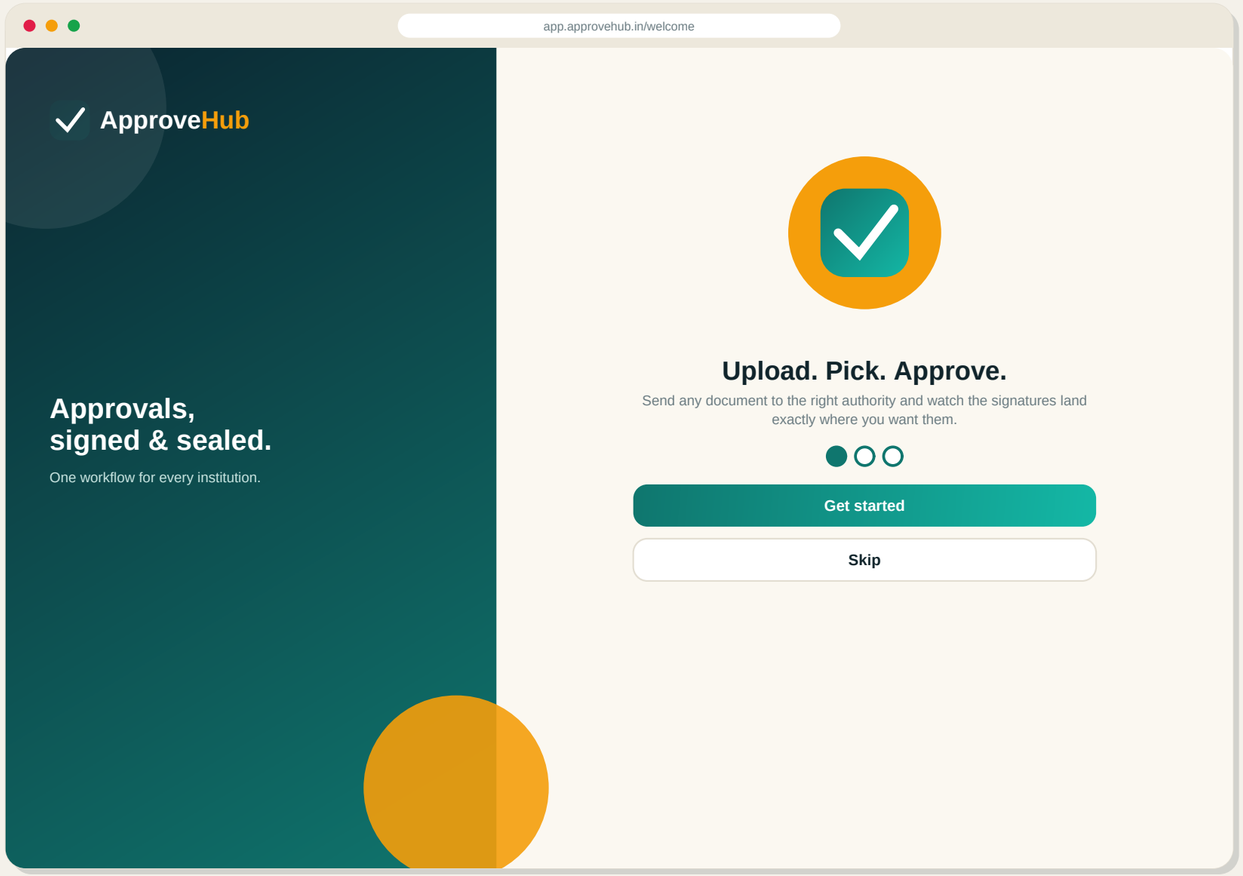

EVERYONE

Splash & onboarding

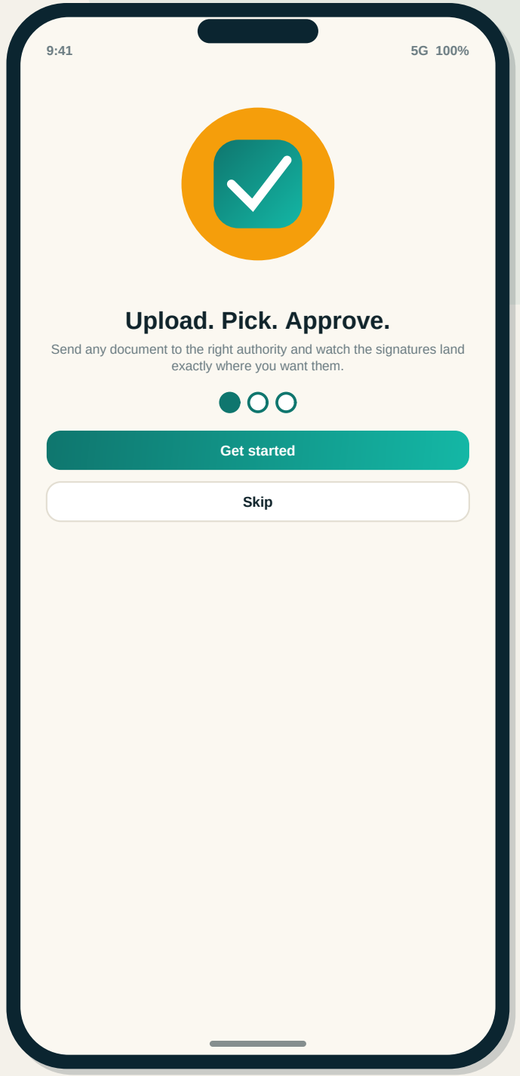

The first thing a new installer sees: three short slides explaining the product, then straight to account creation.

- **3 swipeable intro slides**
- **Skip at any time**
- **Same brand on web and app**

WEB

APP

ApproveHub

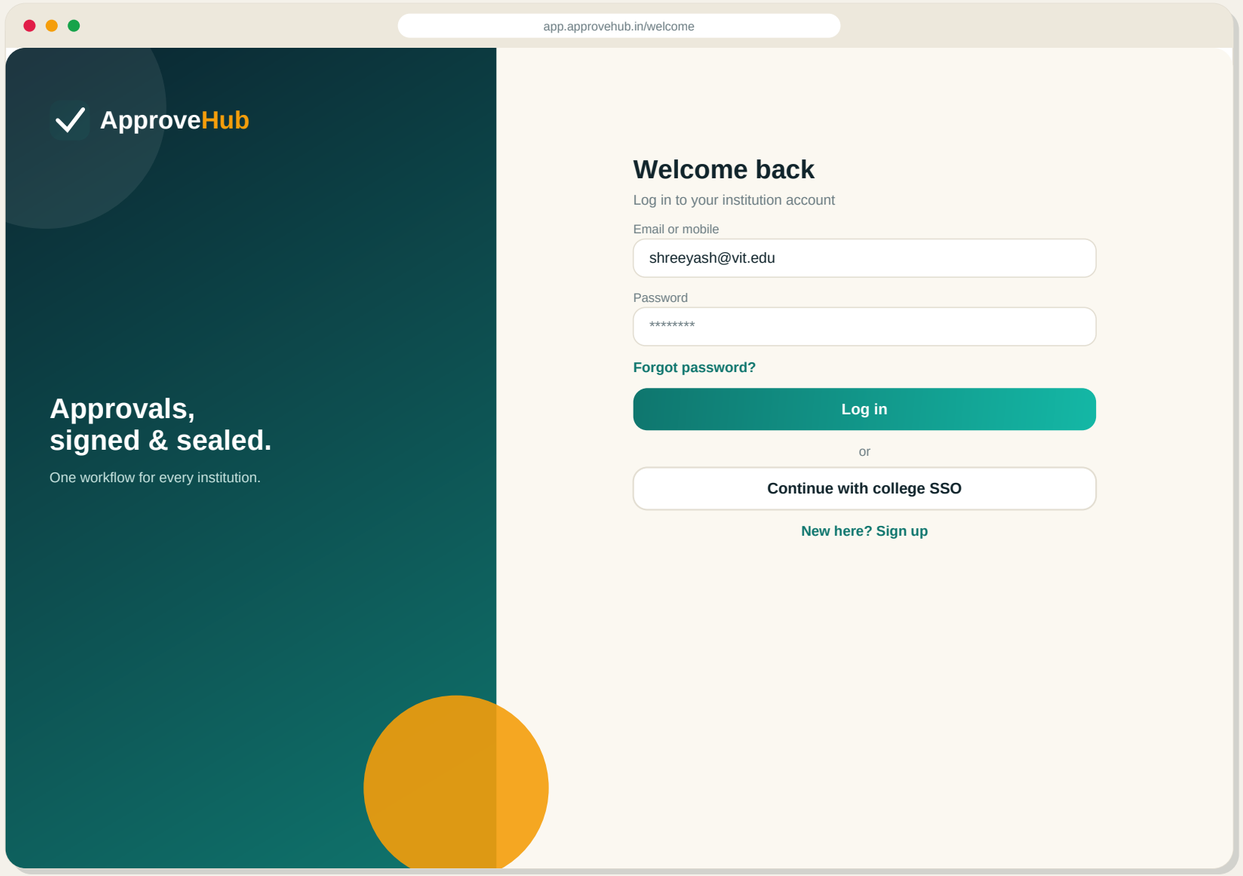

EVERYONE

Login

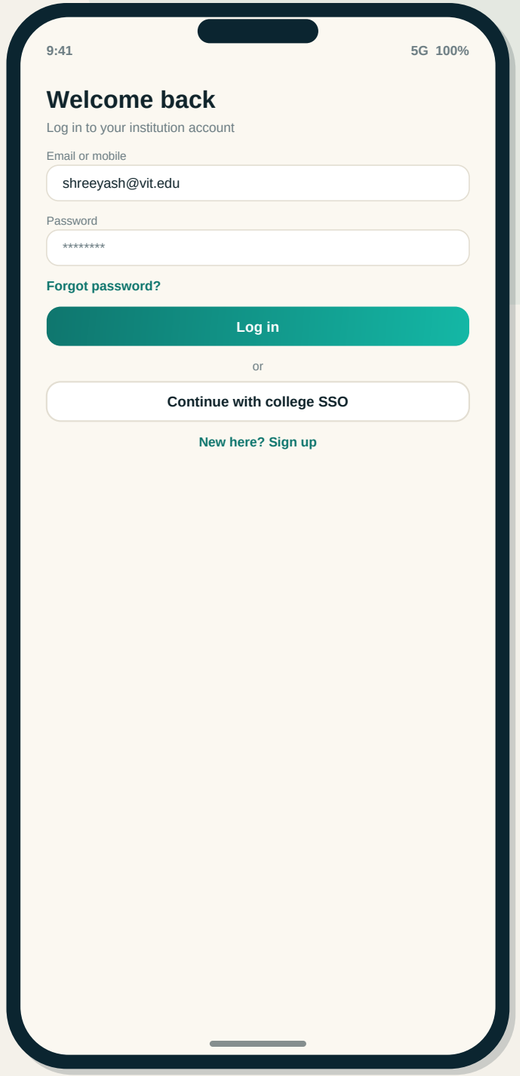

Returning users sign in with email or mobile, or through their college single sign-on.

- **Email / mobile + password**
- **College SSO shortcut**
- **Forgot-password entry point**

WEB

APP

ApproveHub

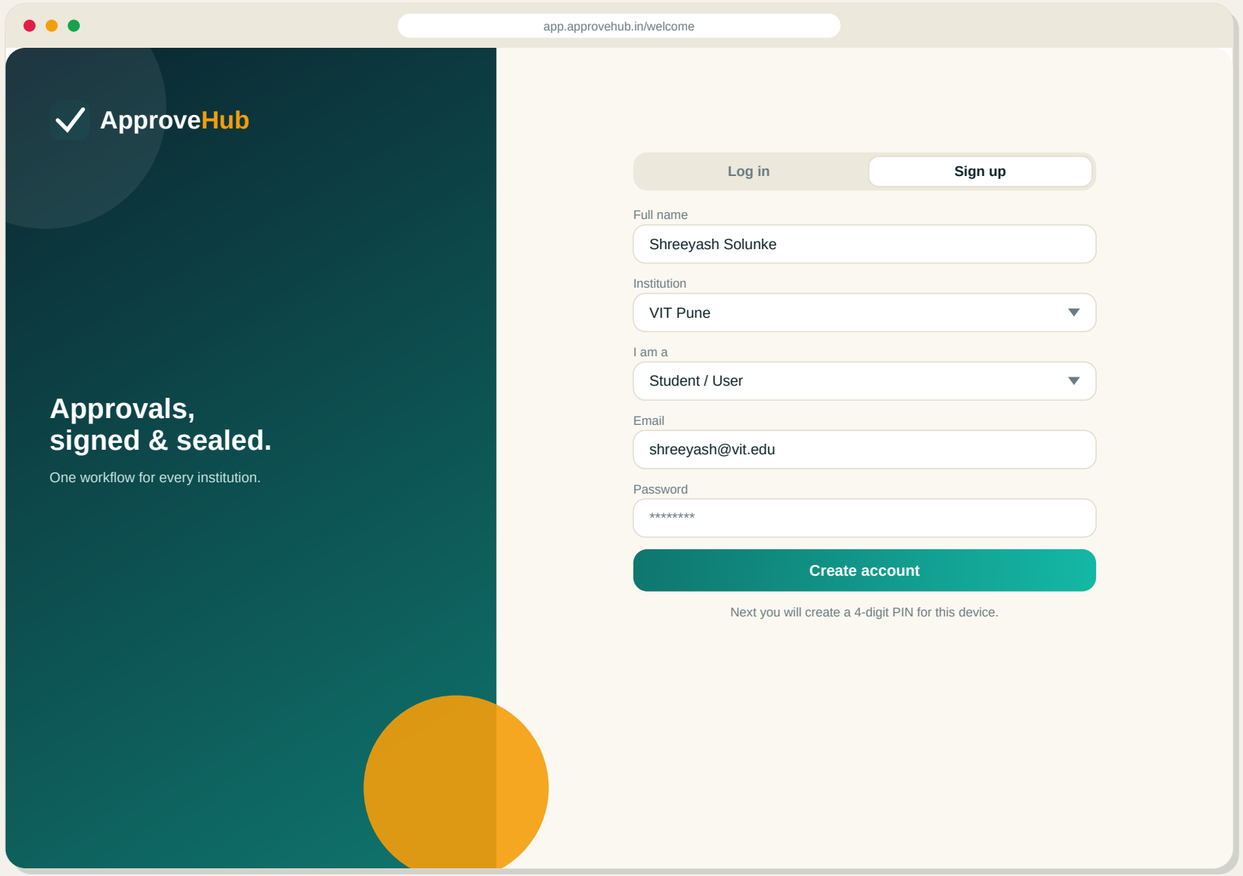

EVERYONE

Sign up

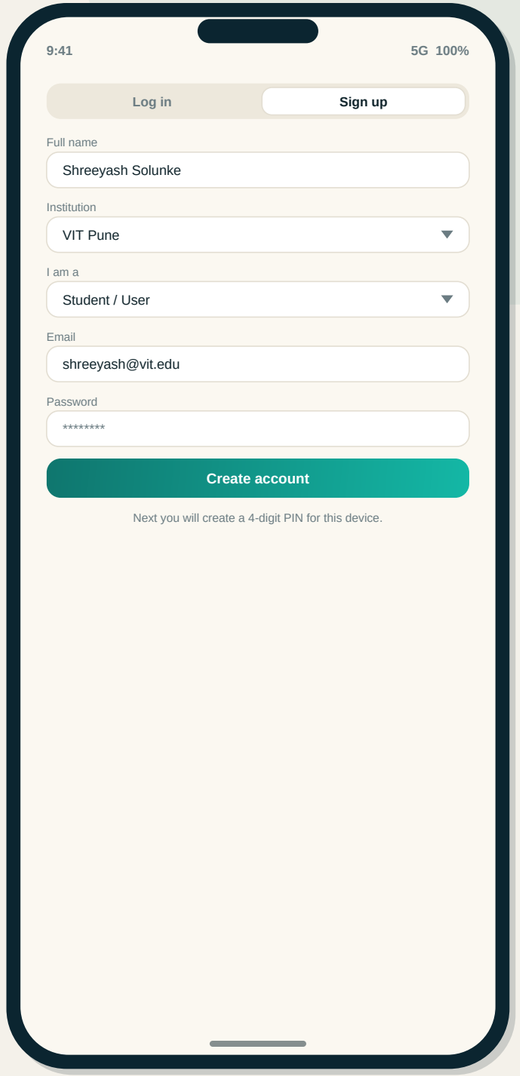

First-time installers create an account, pick their institution and say whether they are a user, an authority or an admin.

- **Institution picker (multi-tenant)**
- **Role selection at signup**
- **Leads to PIN creation**

WEB

APP

ApproveHub

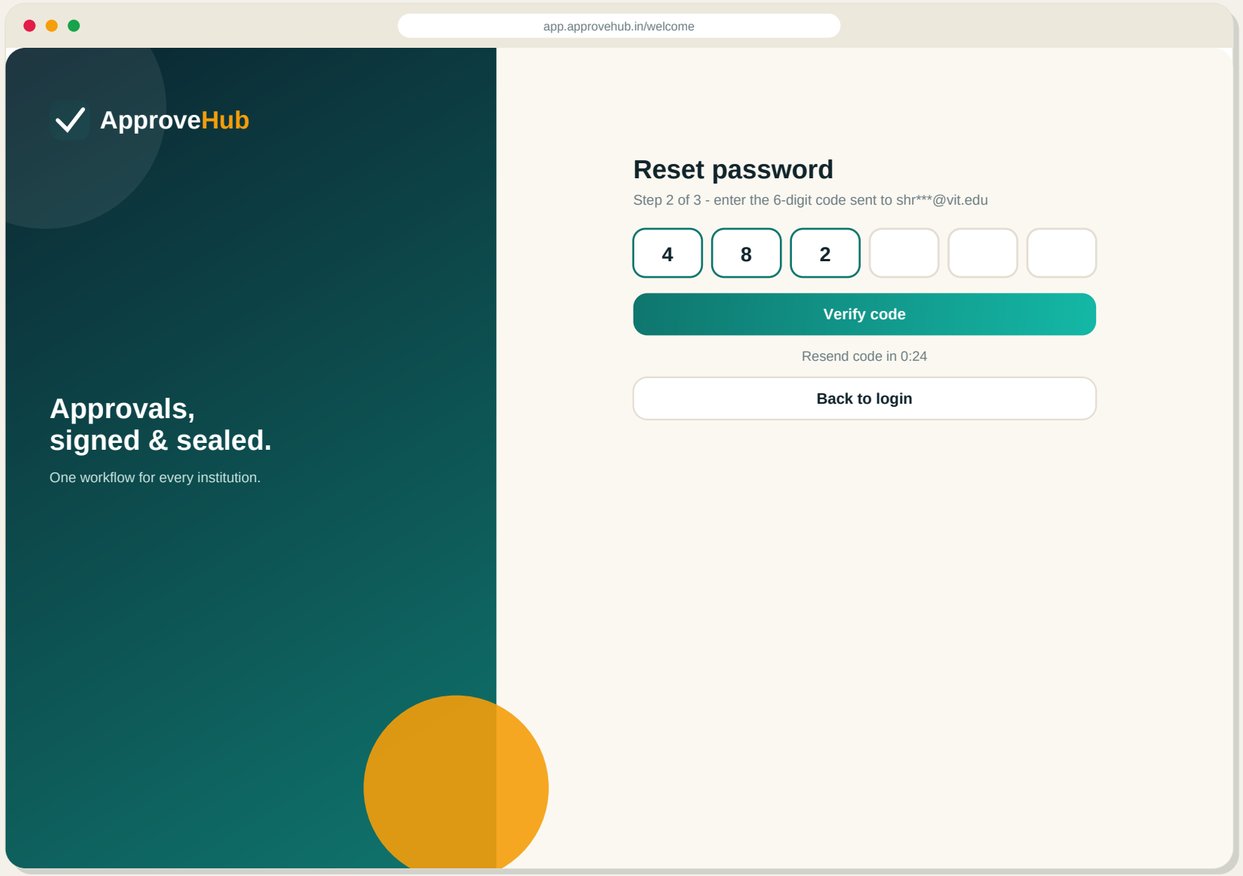

EVERYONE

Forgot password

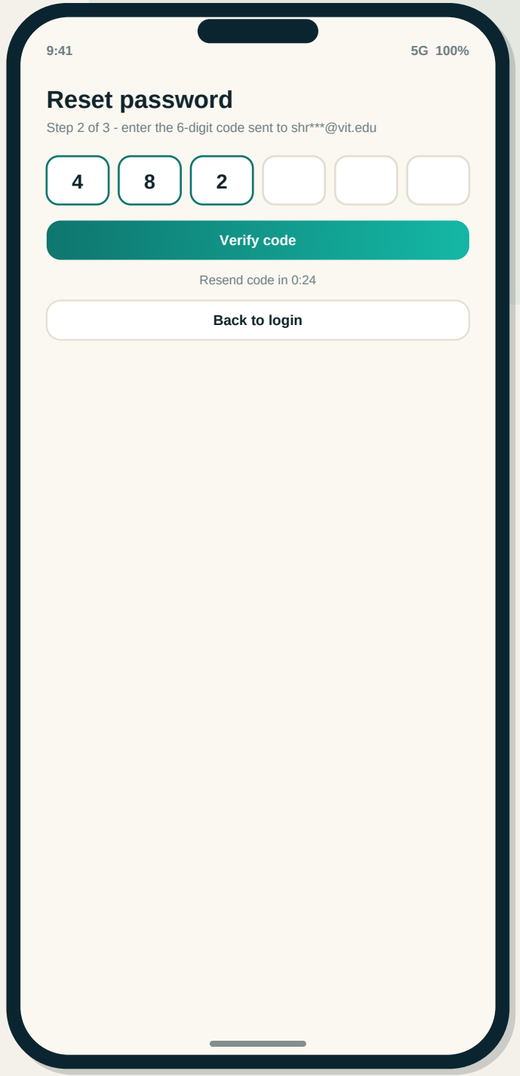

Three-step recovery: enter email or mobile, verify a 6-digit OTP, set a new password.

- **OTP verification**
- **Resend timer**
- **Back to login**

WEB

APP

ApproveHub

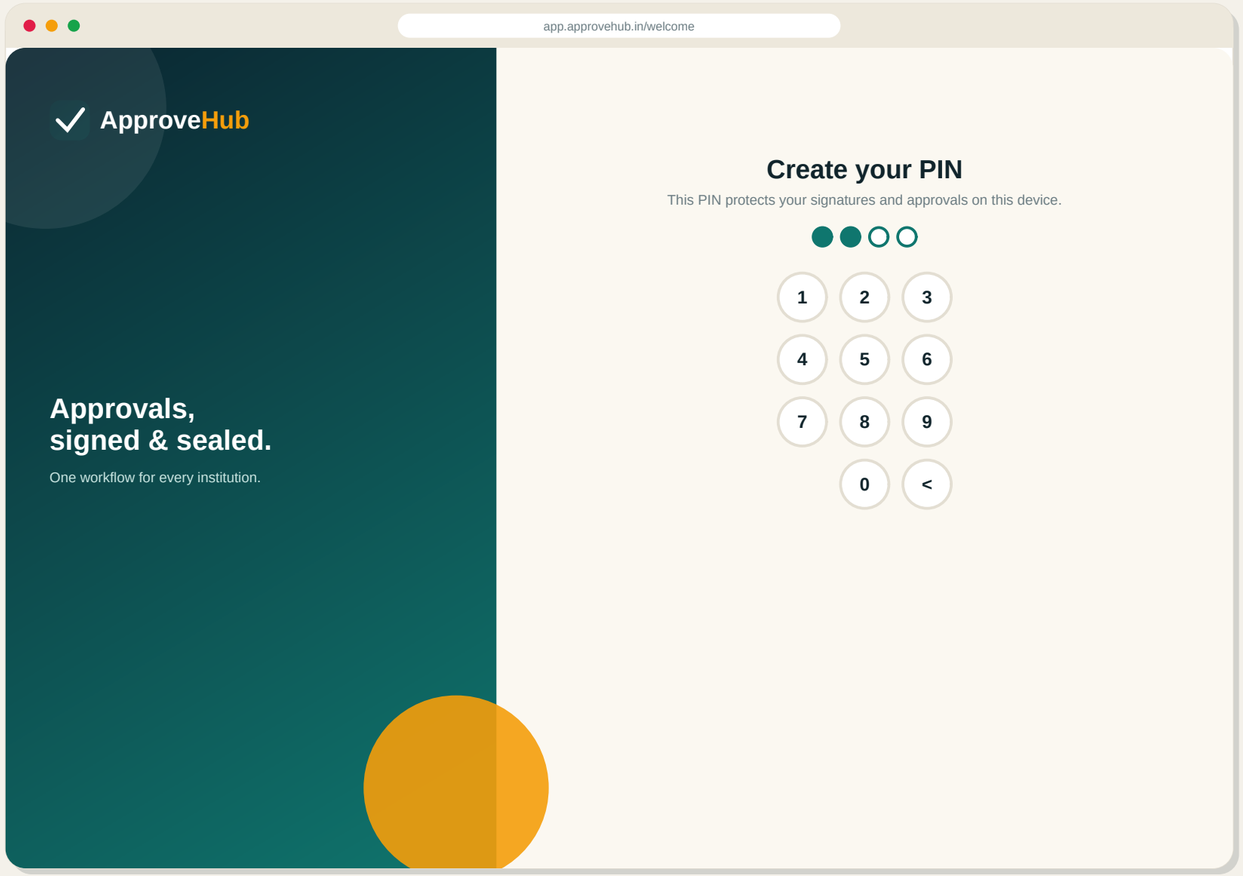

EVERYONE

Create PIN (first install)

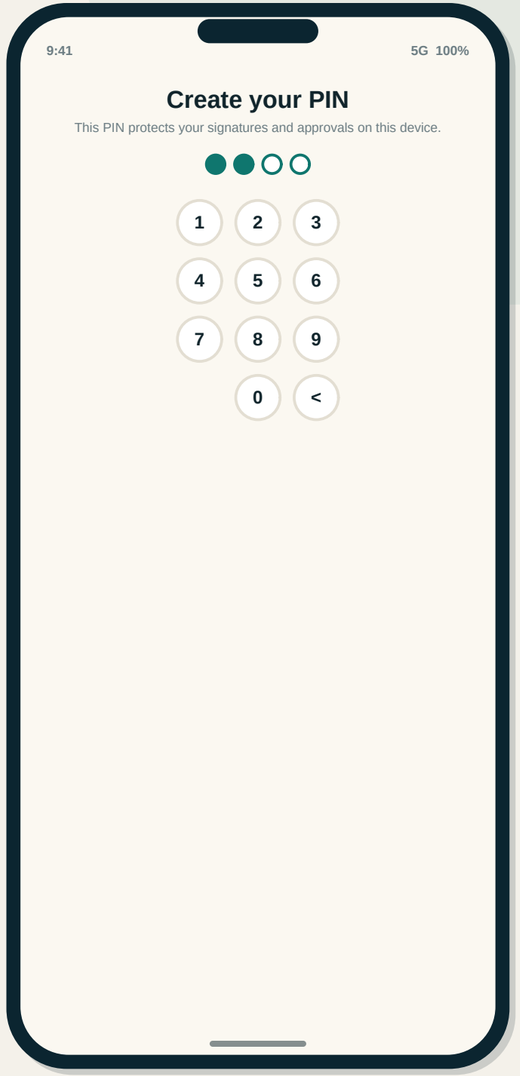

After the first successful login the 4-digit PIN is activated. It guards the app and every approval made on this device.

- **Activated right after signup**
- **Numeric keypad with dots**
- **Required to apply any mark**

WEB

APP

ApproveHub

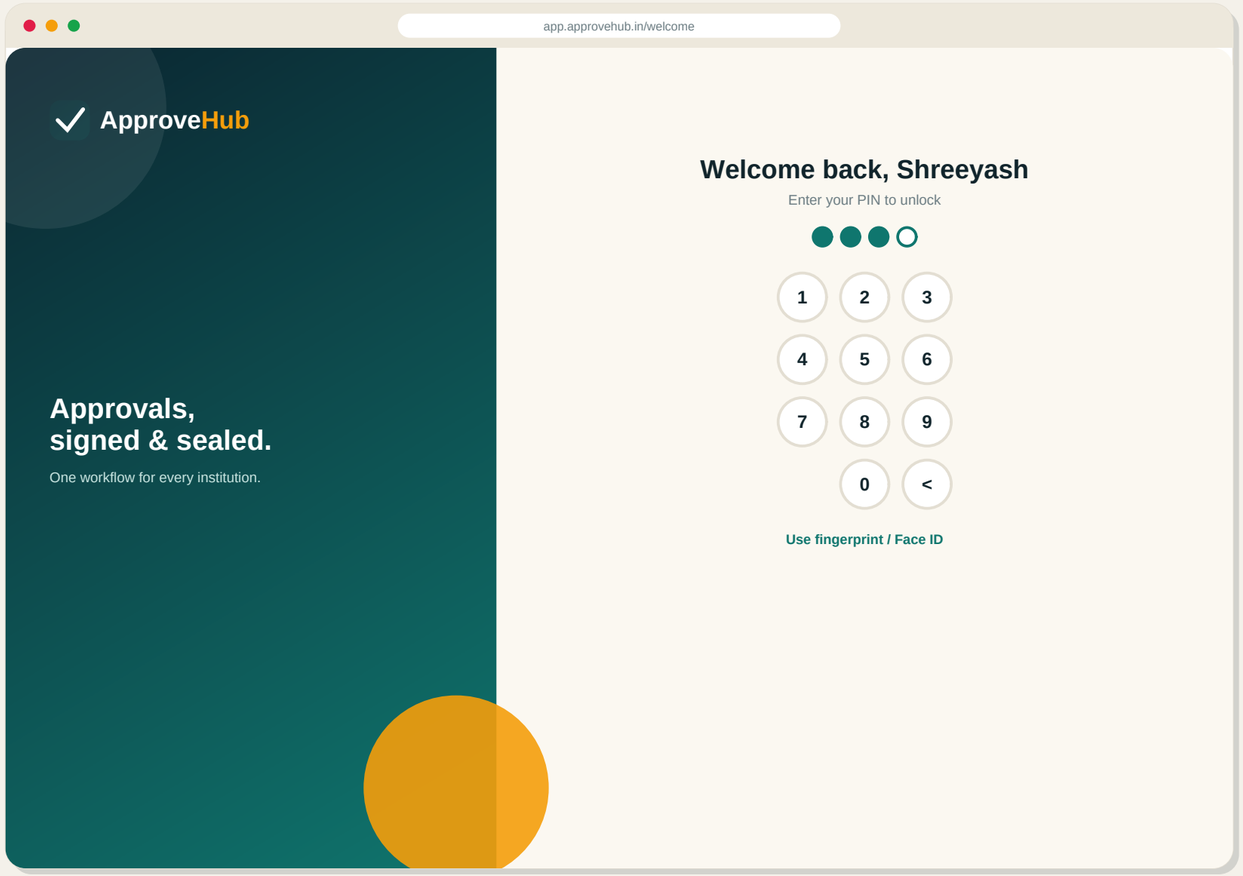

EVERYONE

PIN unlock

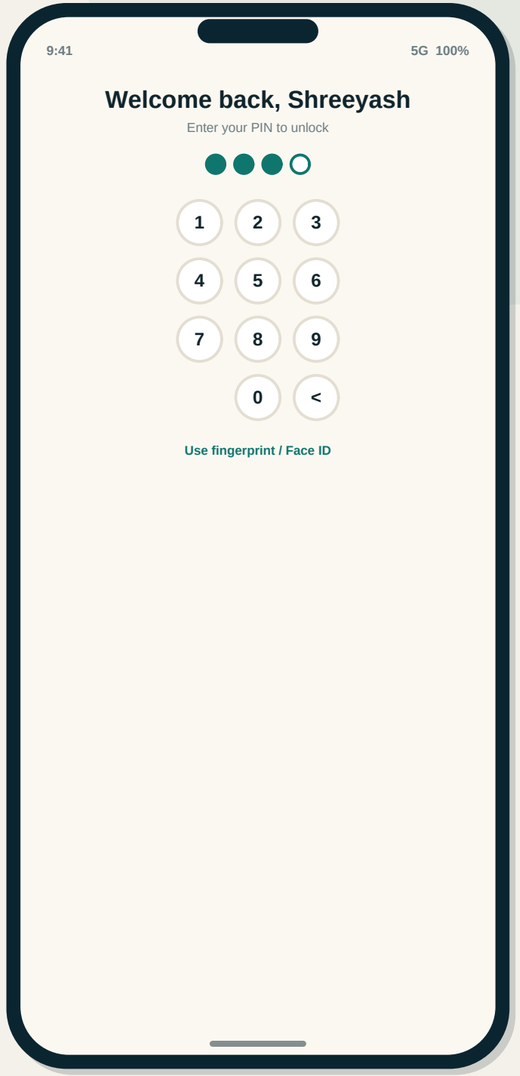

Every later launch asks for the PIN (or biometrics) before anything is shown.

- **Fast unlock**
- **Biometric fallback**
- **Lock button always in the menu**

WEB

APP

ApproveHub

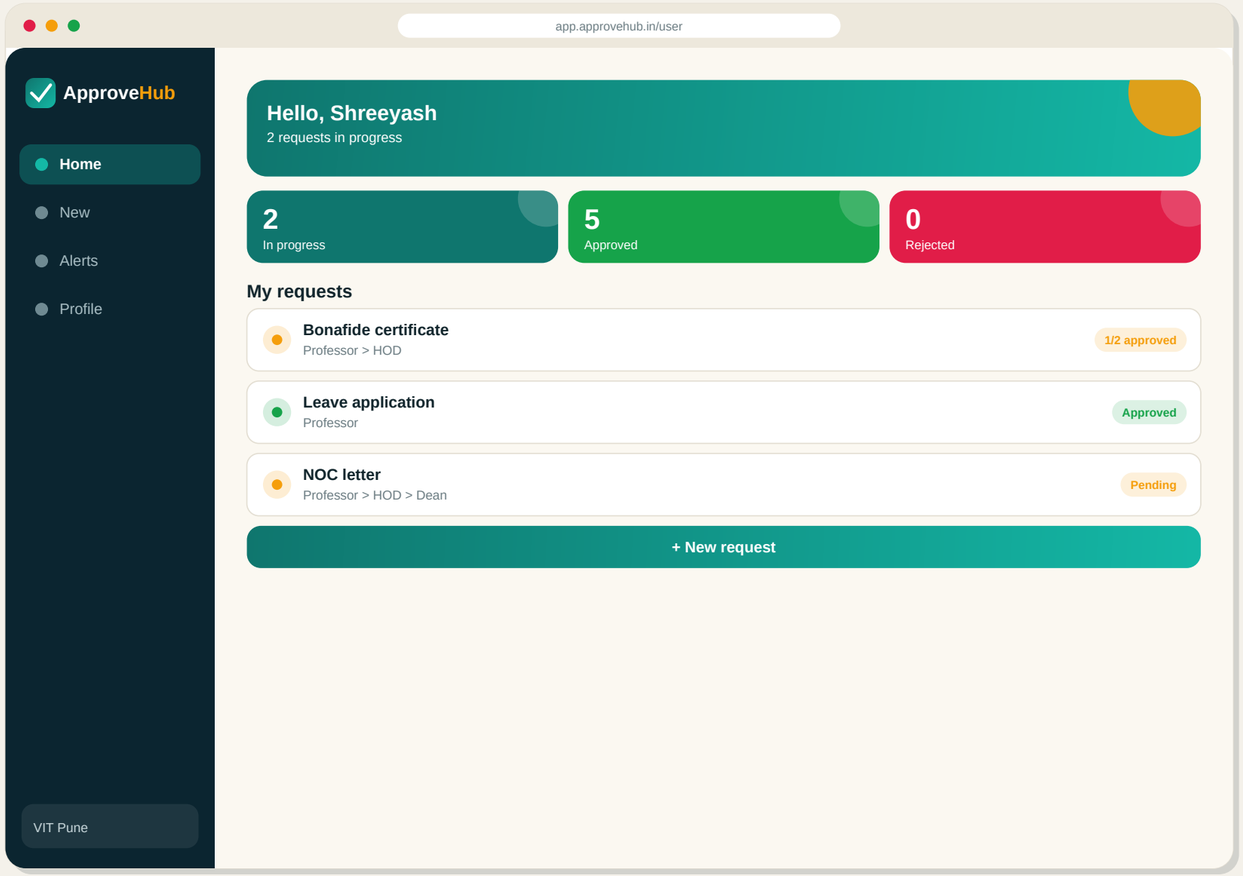

USER

Home - my requests

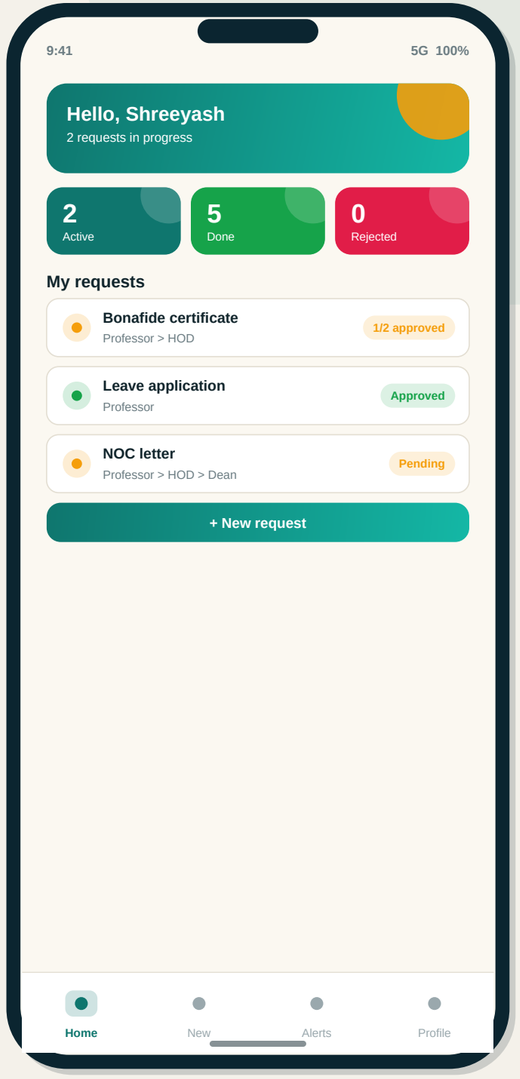

The user dashboard: progress at a glance and every request with its approval status.

- **Live status badges**
- **Quick stats**
- **One tap to start a new request**

WEB

APP

ApproveHub

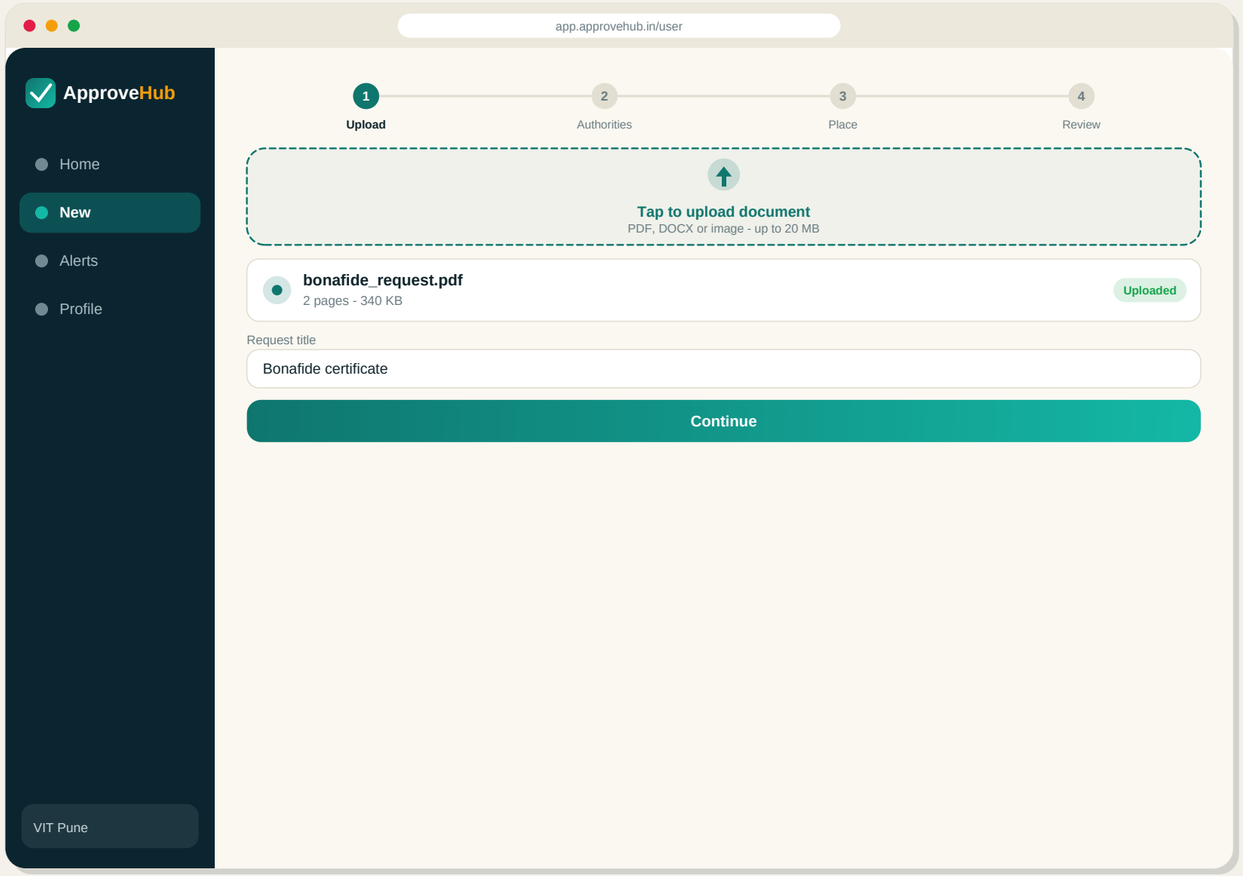

USER

New request - 1 Upload

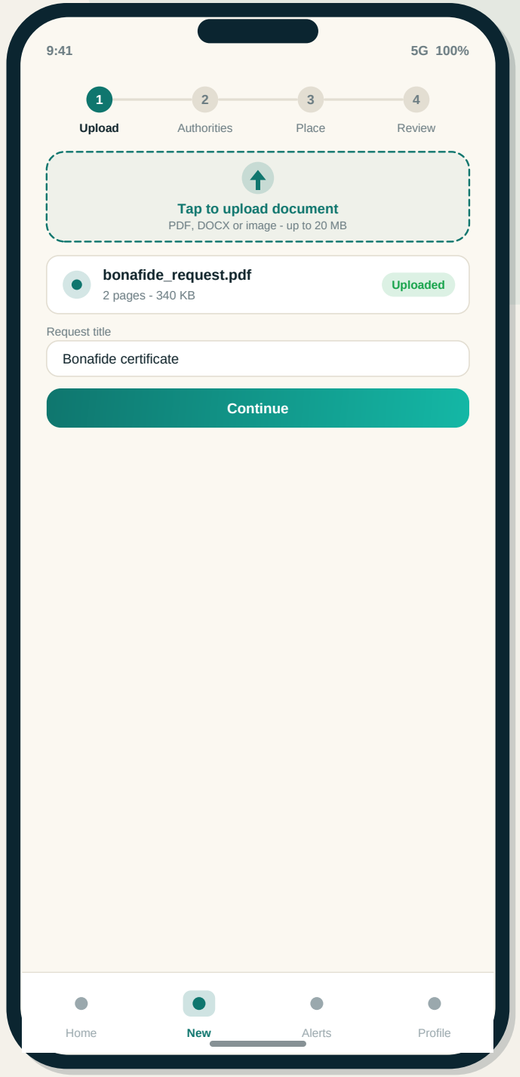

Step one: upload the document and name the request.

- **PDF, DOCX or image**
- **Progress stepper**
- **Clear next action**

WEB

APP

ApproveHub

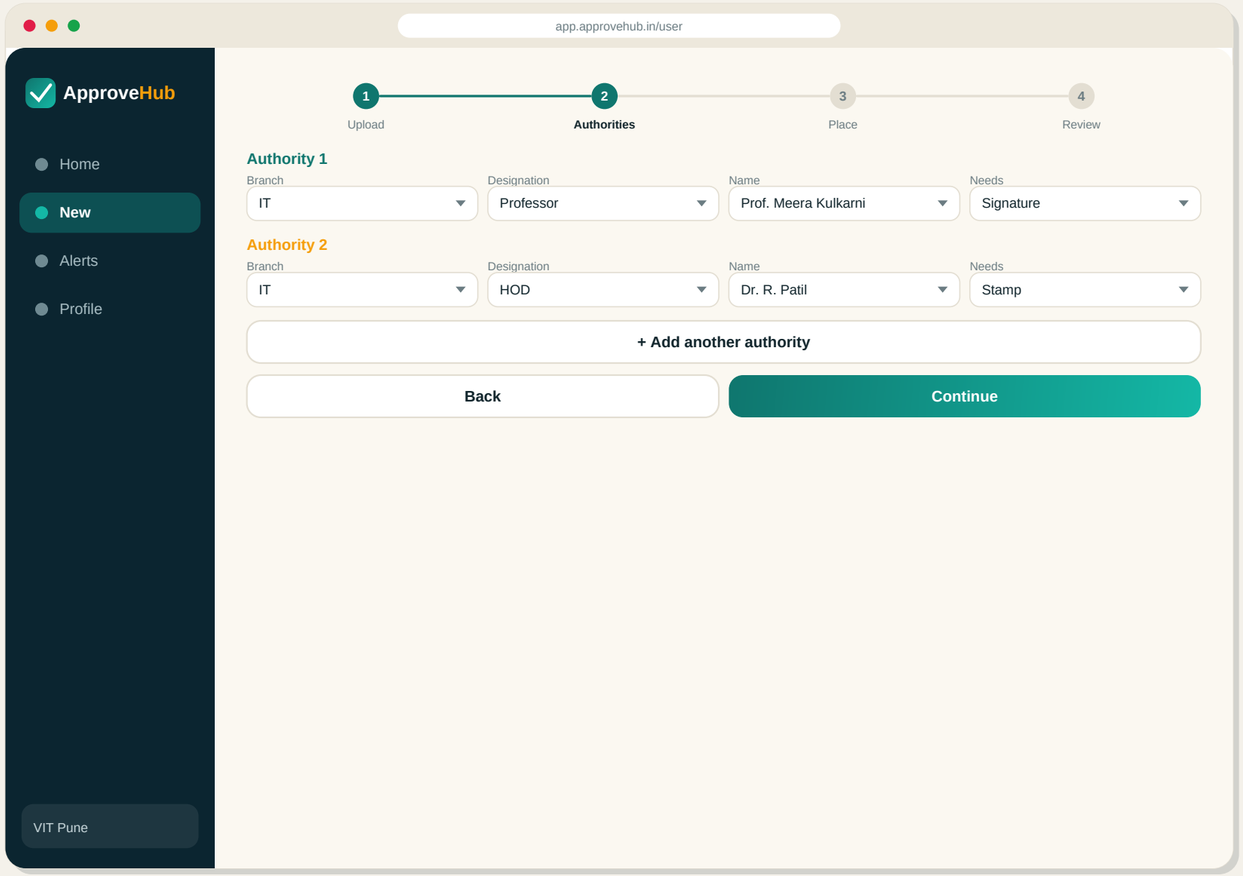

USER

New request - 2 Authorities

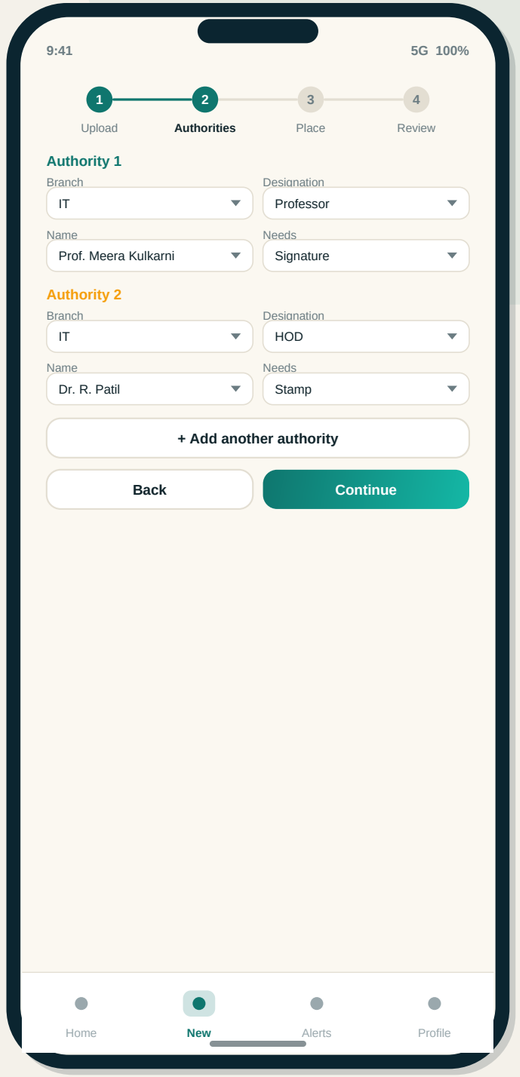

For each approver choose branch, then designation, then the person, and what is needed (signature, stamp or seal). Add as many authorities as required, e.g. a HOD after a professor.

- **Branch > Designation > Name**
- **Signature / Stamp / Seal per person**
- **+ Add another authority**

WEB

APP

ApproveHub

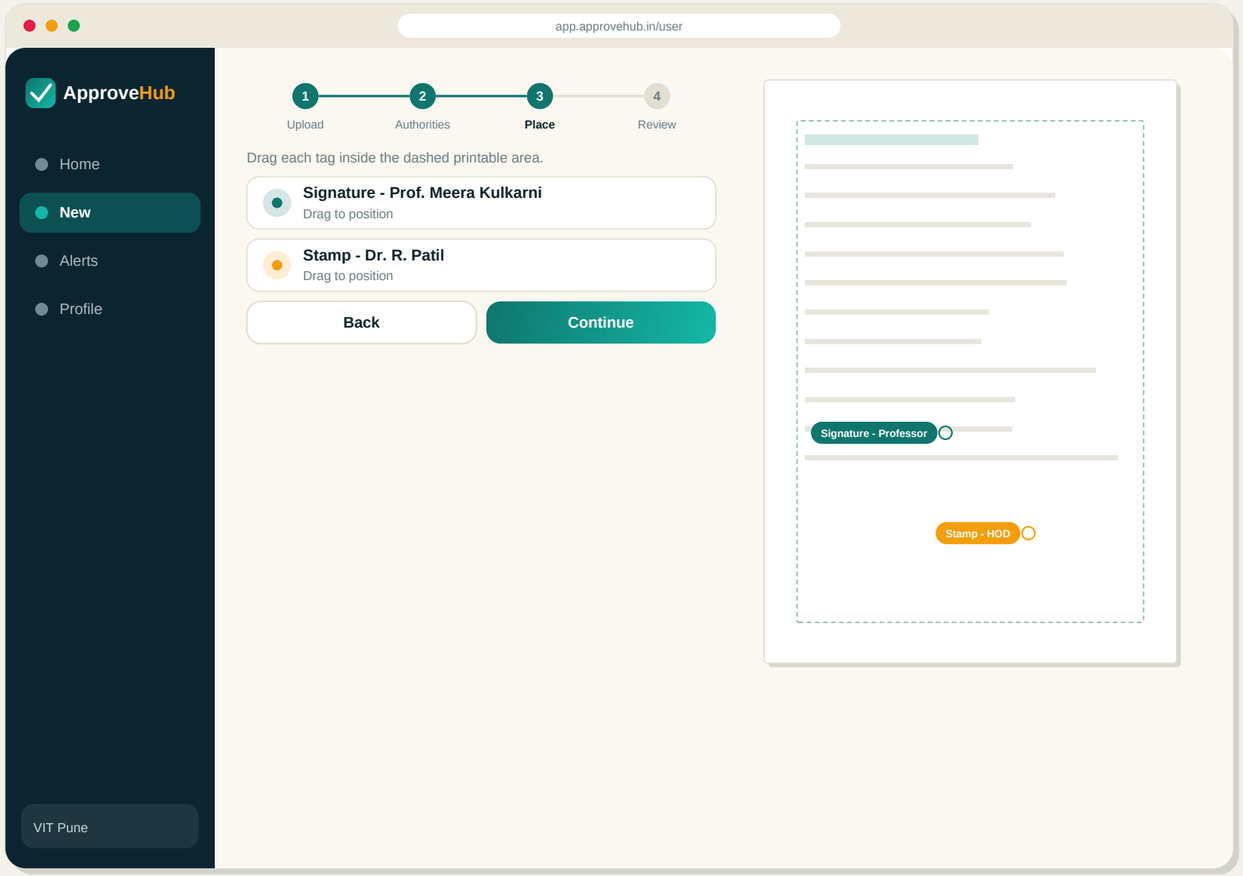

USER

New request - 3 Place marks

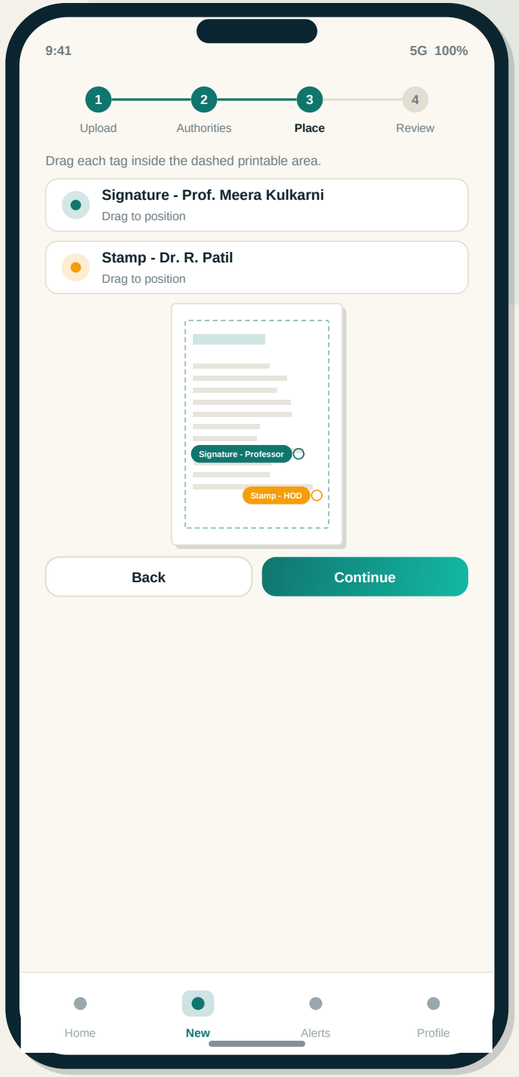

A blank A4 page with a dashed printable area. The user drags each authority's tag to the exact spot where their mark should appear.

- **Drag inside printable area**
- **One colour per authority**
- **Positions are saved with the request**

WEB

APP

ApproveHub

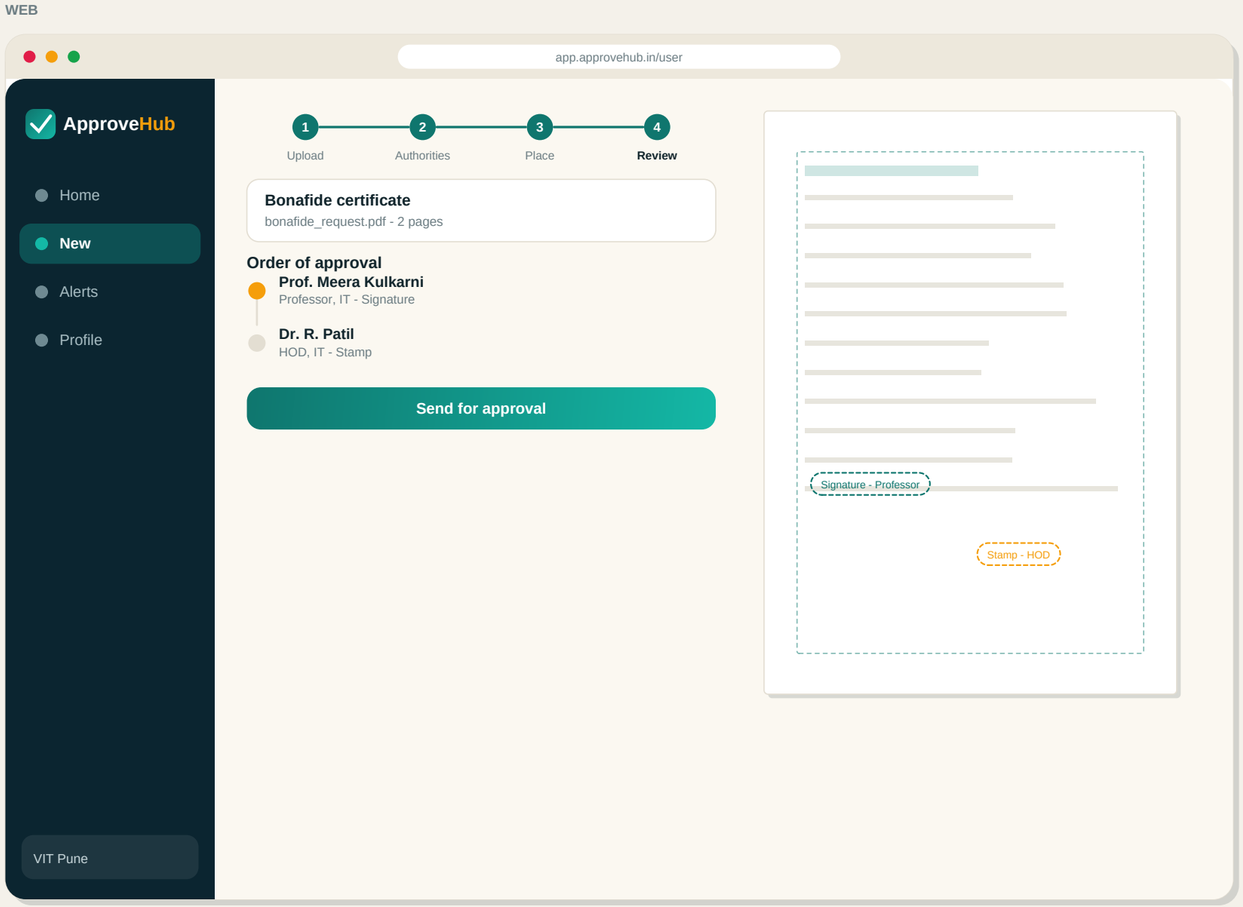

USER

New request - 4
Review & send

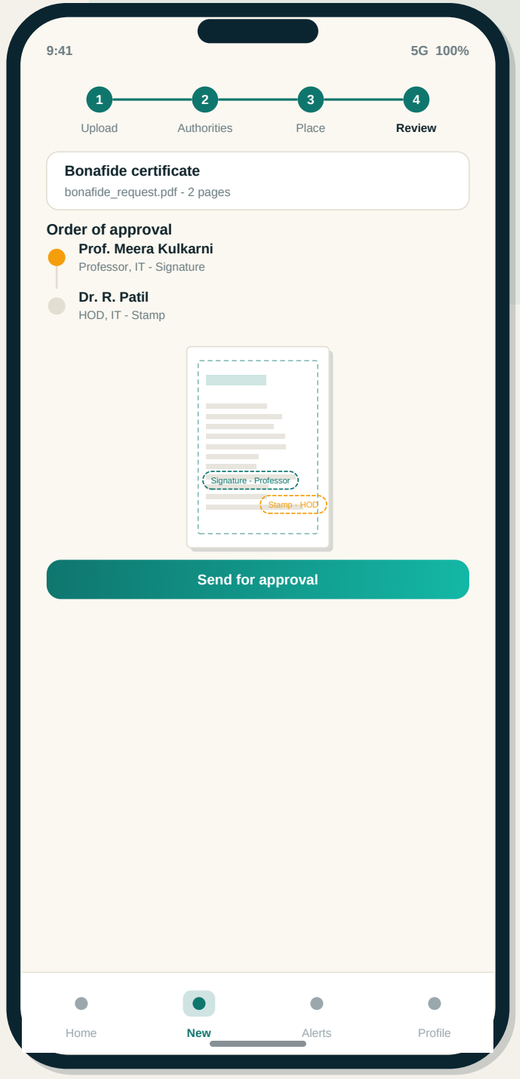

A last check of the approval order and mark positions before sending.

- **Approval order timeline**
- **Ghost marks show final layout**
- **Send for approval**

WEB

APP

ApproveHub

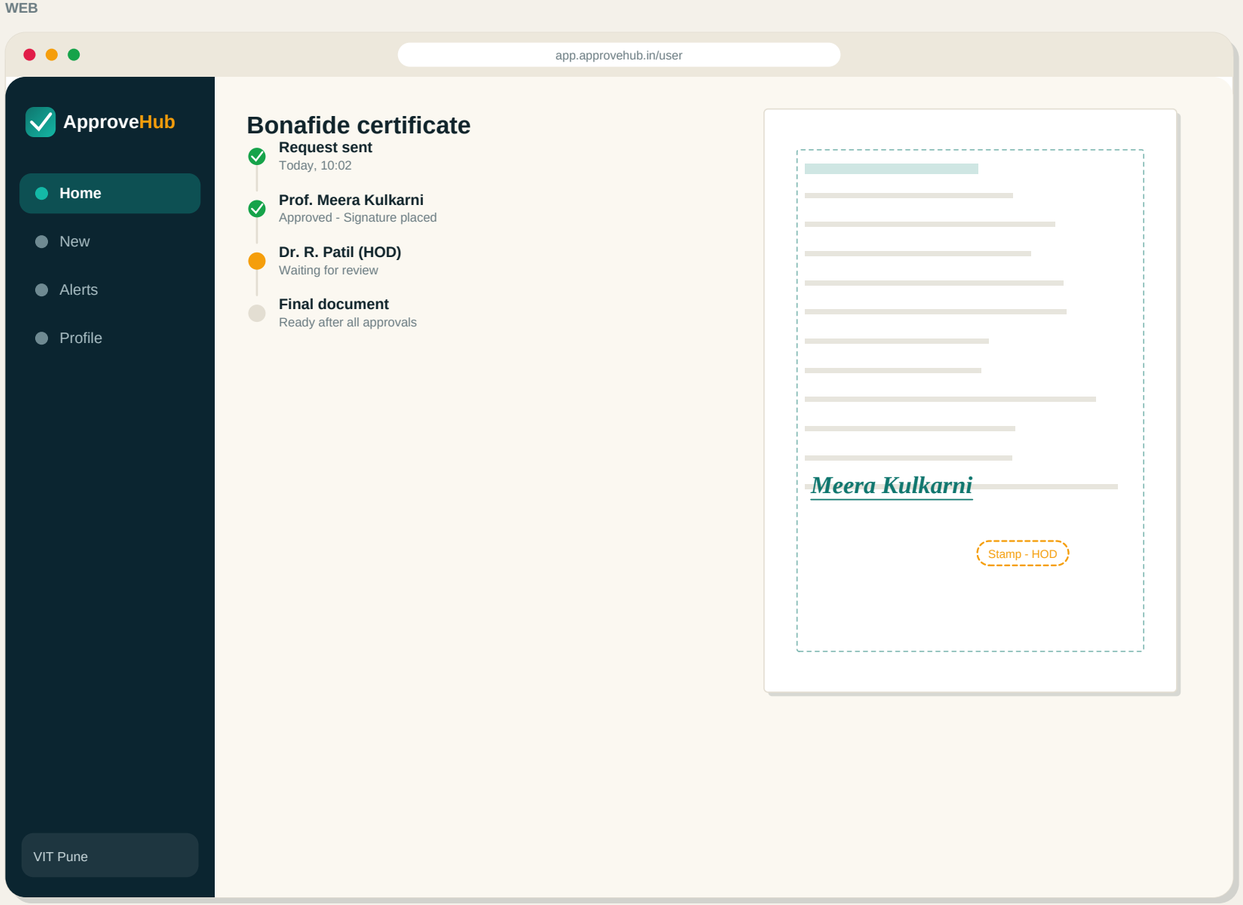

USER

Request detail

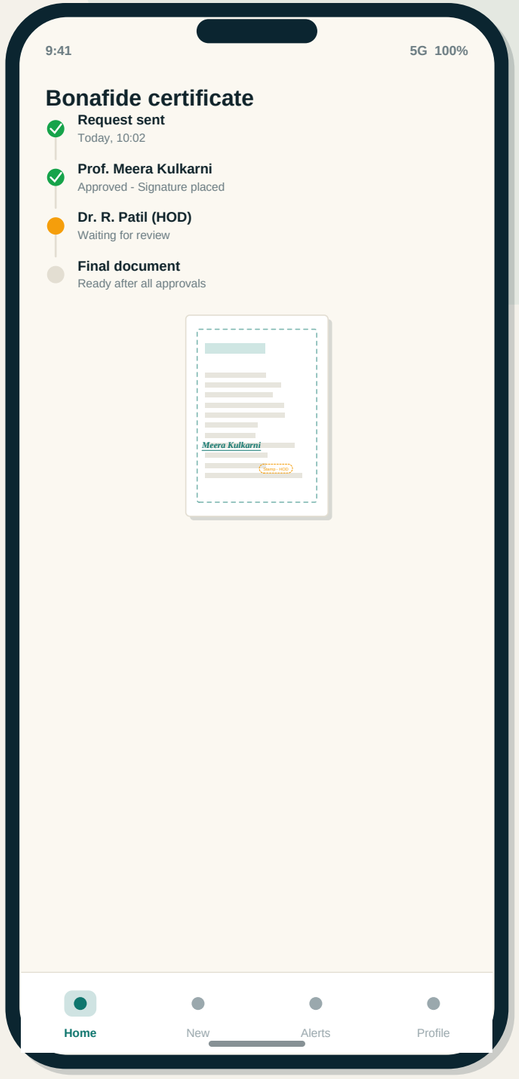

Track a request. When the professor approves, their mark appears on the page and the request moves on to the HOD.

- **Live approval timeline**
- **Approved marks appear in place**
- **Pending marks stay as outlines**

WEB

APP

ApproveHub

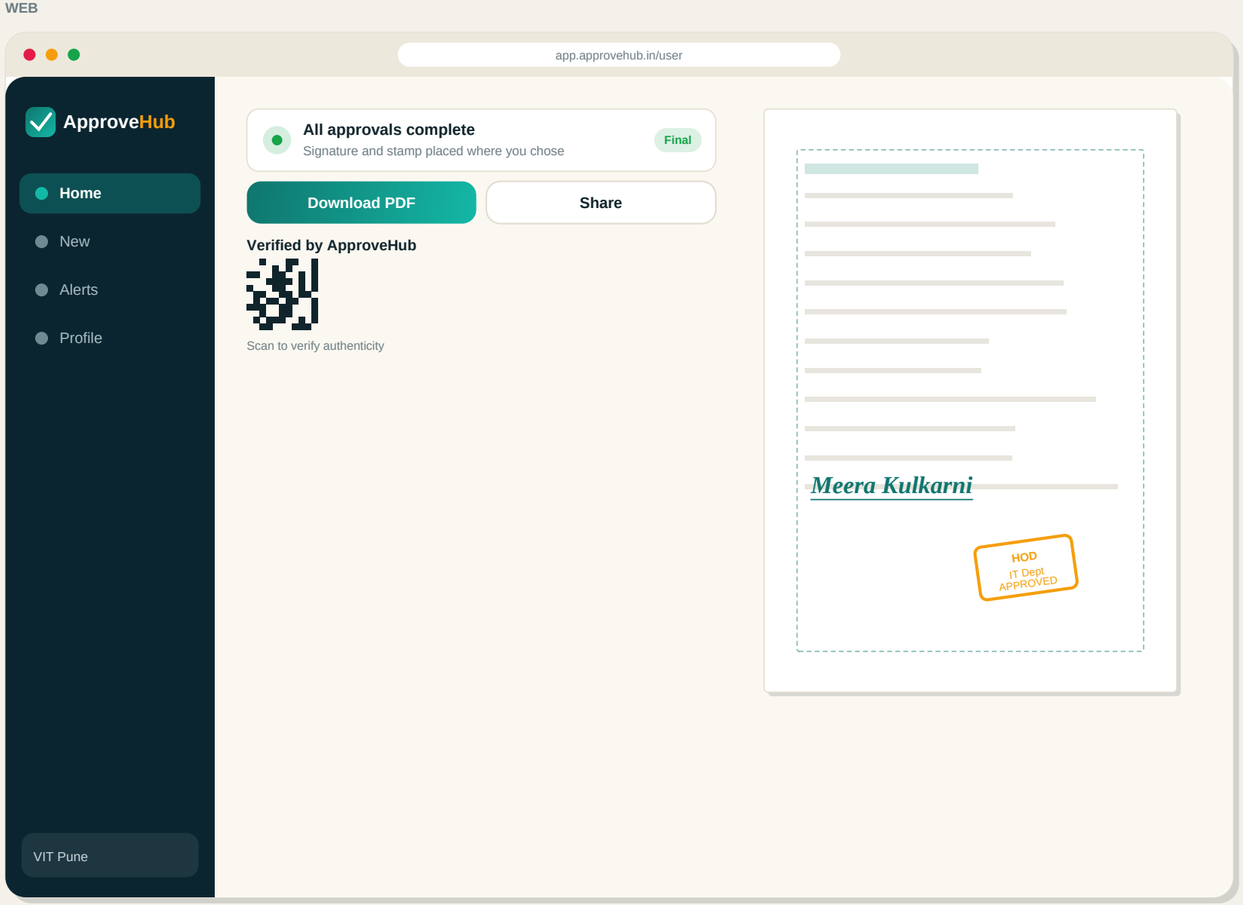

USER

Final approved document

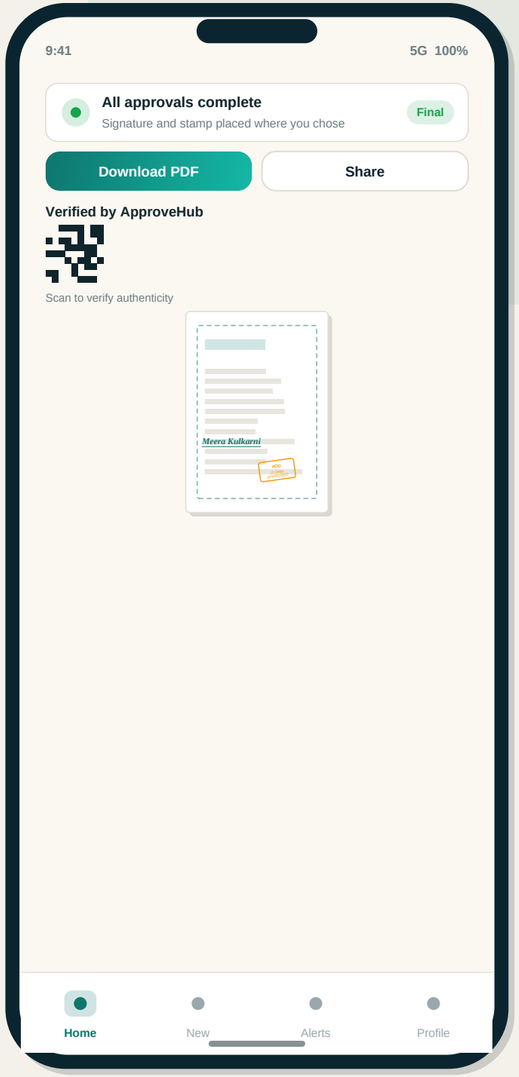

Once everyone has approved, all marks sit exactly where the user placed them. Download, share or verify with the QR code.

- **Download as PDF**
- **Verification QR**
- **All marks in chosen positions**

WEB

APP

ApproveHub

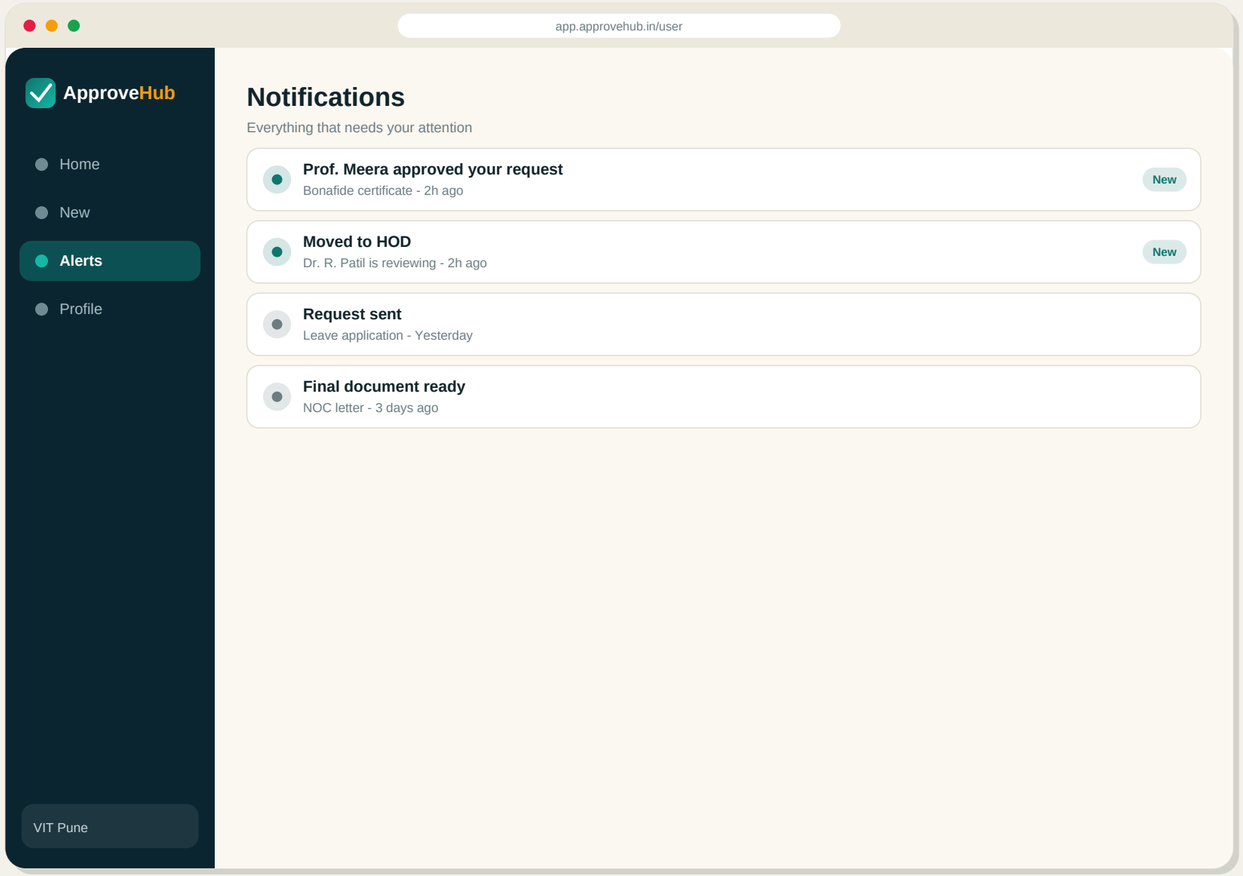

USER

Notifications

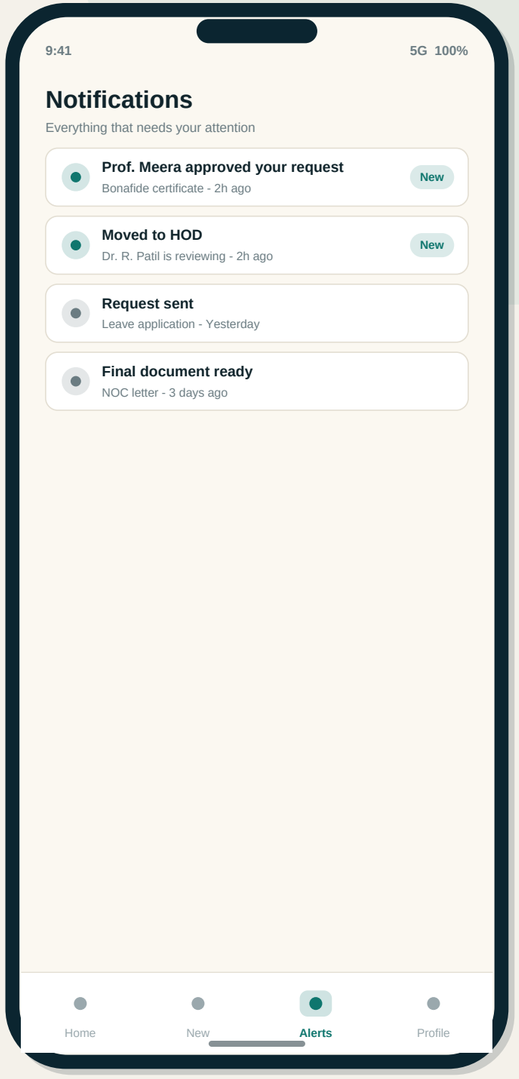

Status changes, approvals and rejections arrive here. The same page exists for authorities and admins.

- **Unread highlights**
- **Per-request context**
- **Shared across all roles**

WEB

APP

ApproveHub

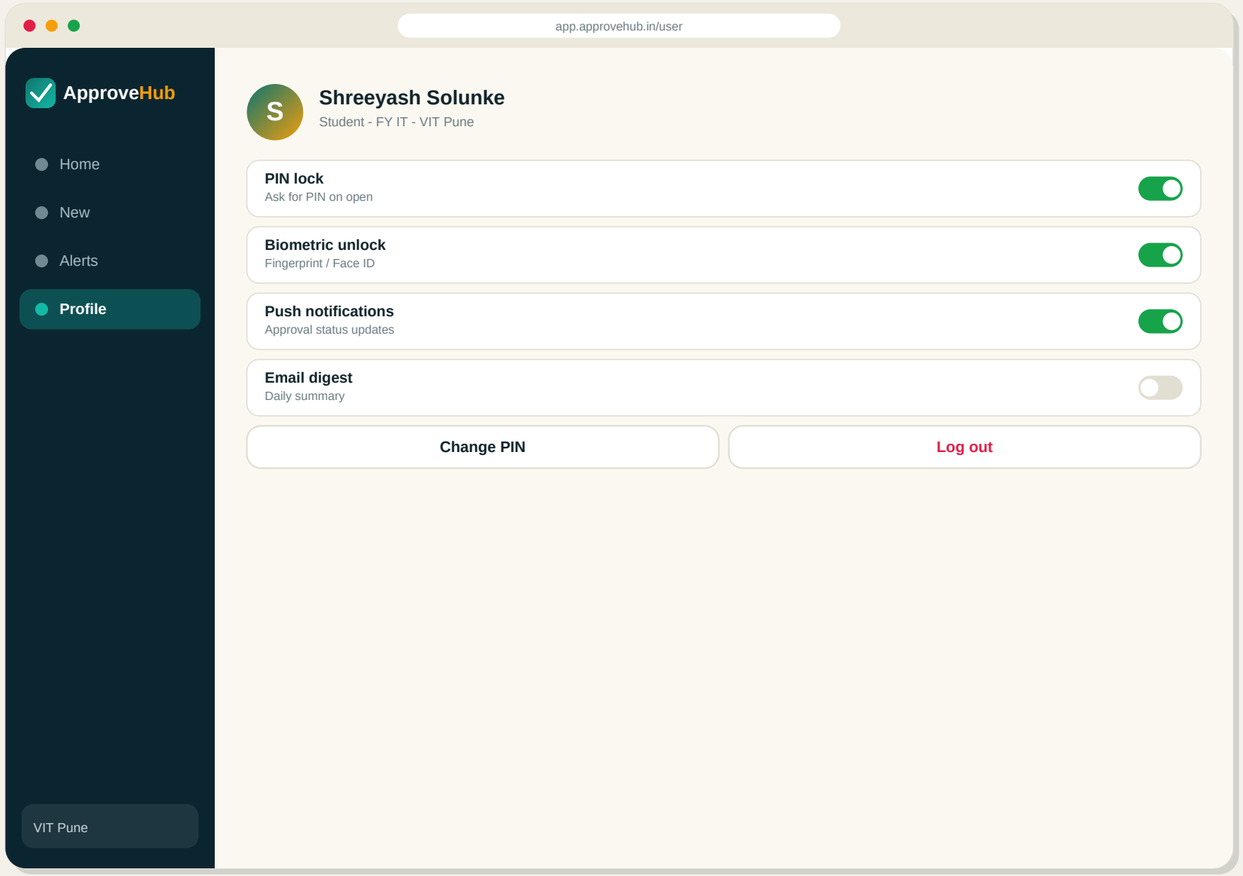

USER

Profile & security

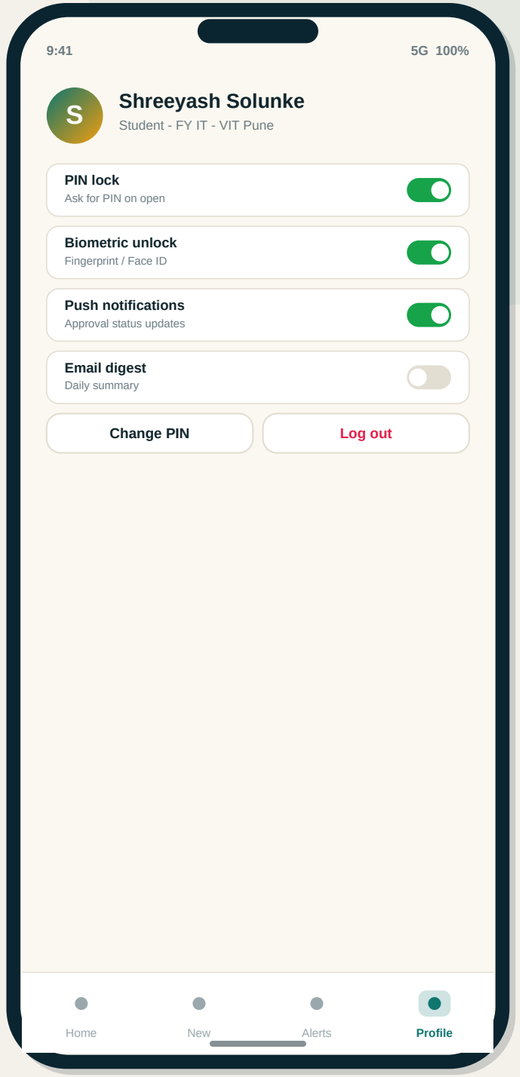

Control PIN, biometrics and notification preferences, or log out.

- **Change PIN**
- **Biometric unlock**
- **Notification settings**

WEB

APP

ApproveHub

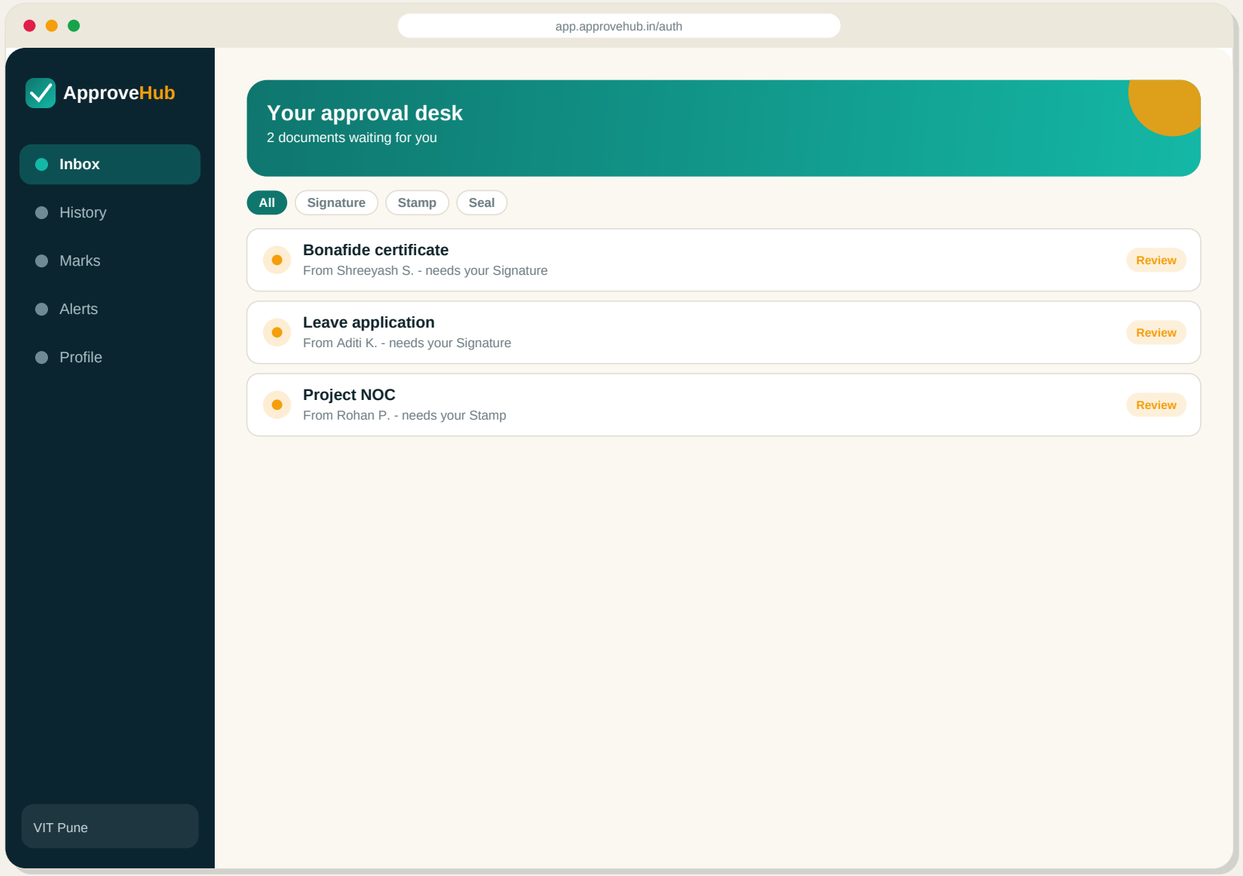

AUTHORITY

Inbox

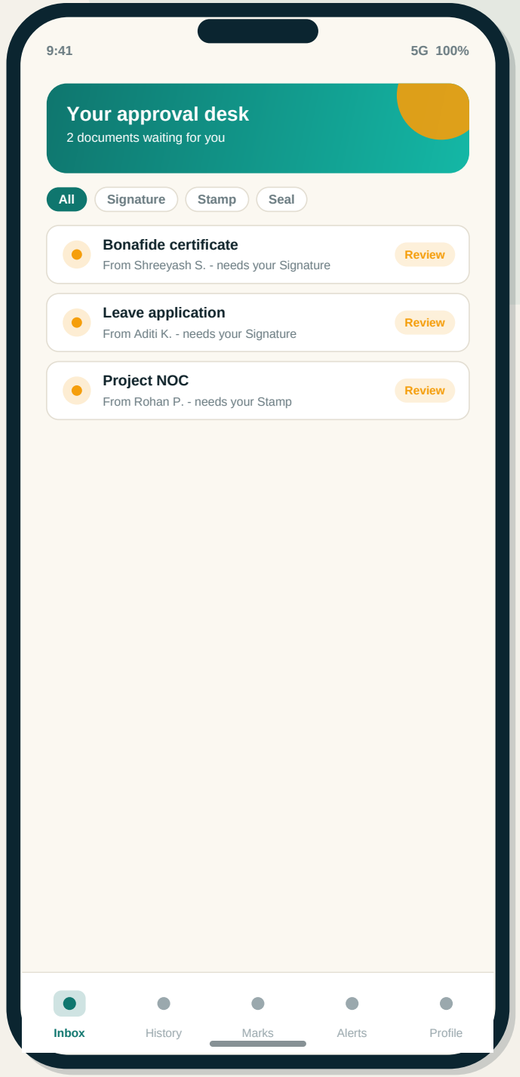

Professors, HODs and other authorities see only the documents waiting for their mark.

- **Filter by mark type**
- **Review badge on each item**
- **Pending count at the top**

WEB

APP

ApproveHub

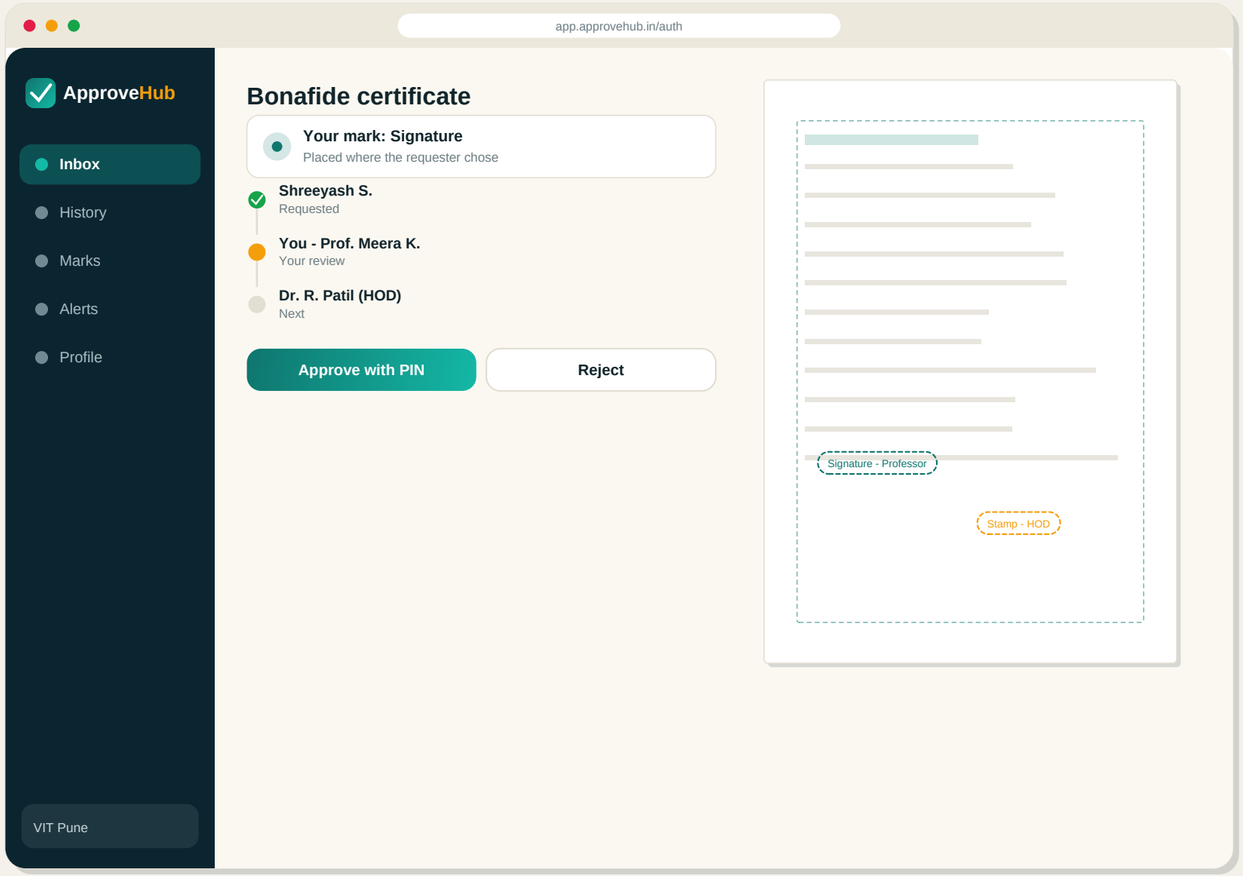

AUTHORITY

Review & approve

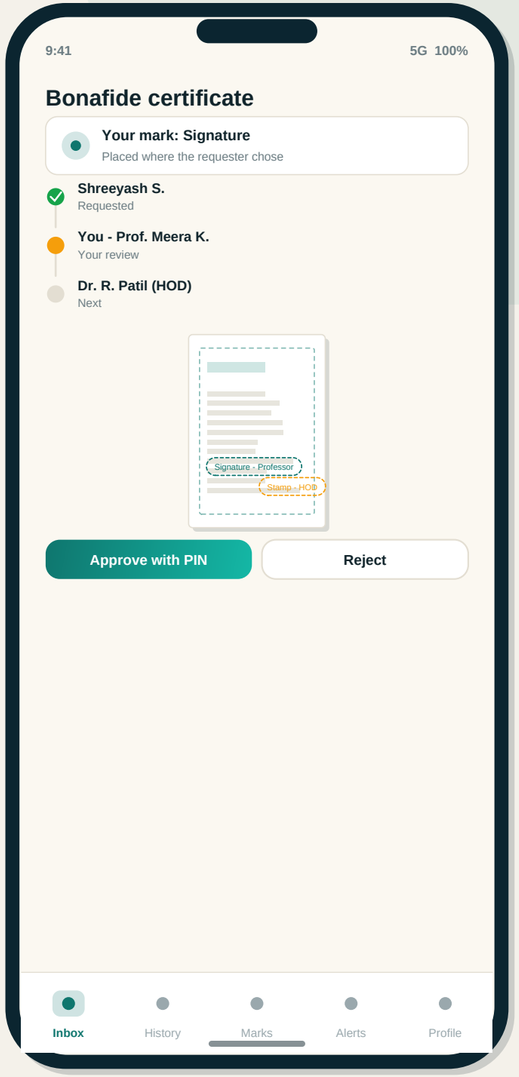

The page opens with the requester's chosen position highlighted. Approve with PIN and the mark lands exactly there, then the request moves to the next authority.

- **Mark preview in place**
- **Approve with PIN**
- **Reject with a reason**

WEB

APP

ApproveHub

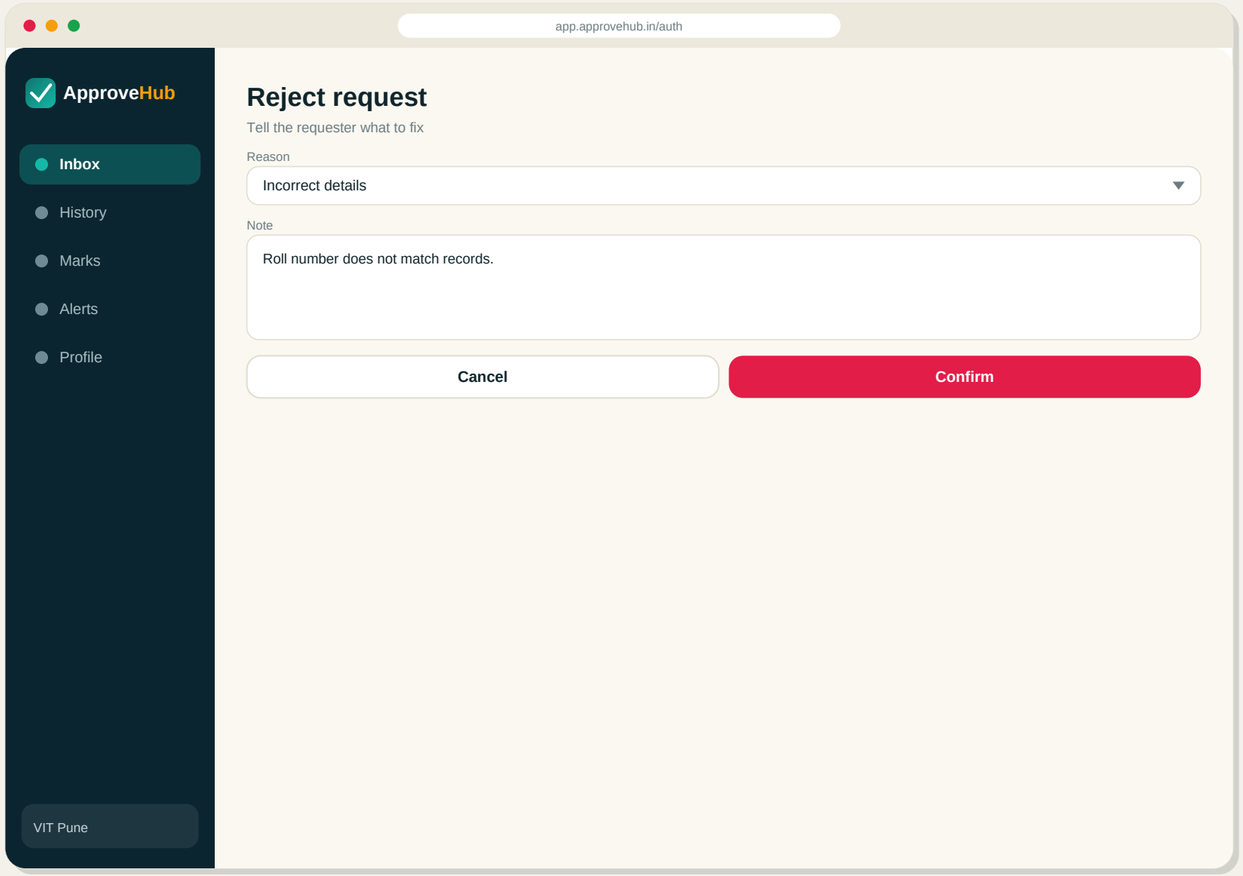

AUTHORITY

Reject with reason

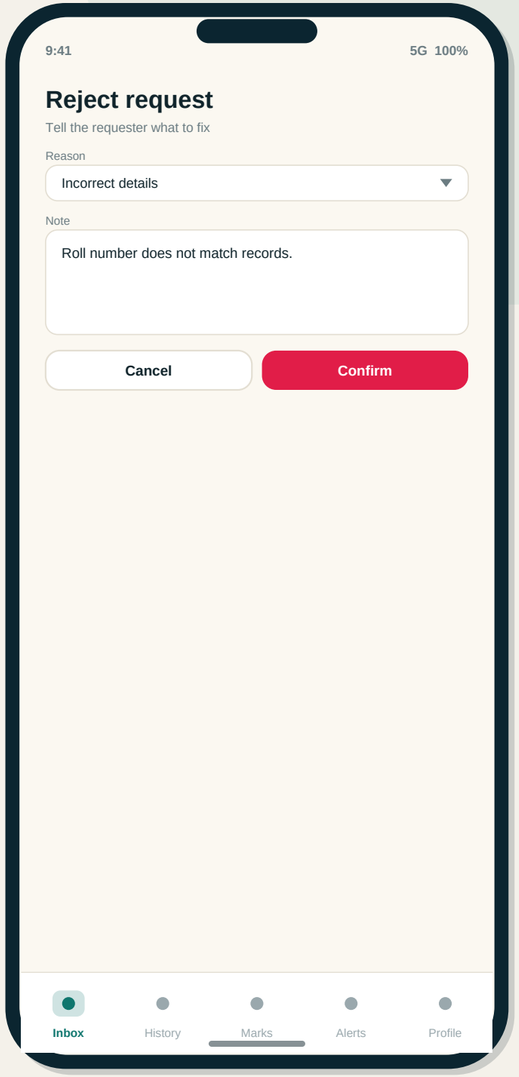

A rejection needs a reason and note so the requester knows exactly what to fix.

- **Reason presets**
- **Free-text note**
- **Requester is notified**

WEB

APP

ApproveHub

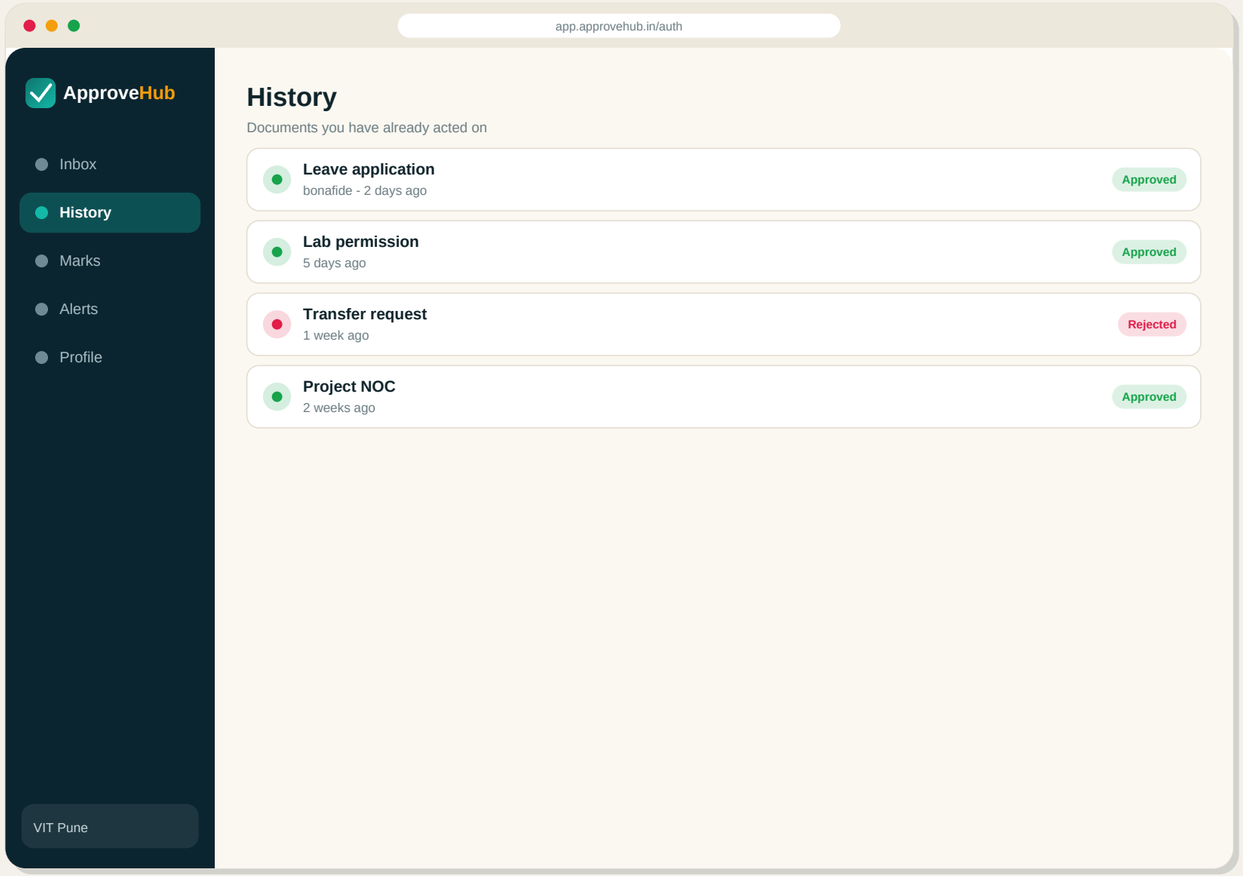

AUTHORITY

History

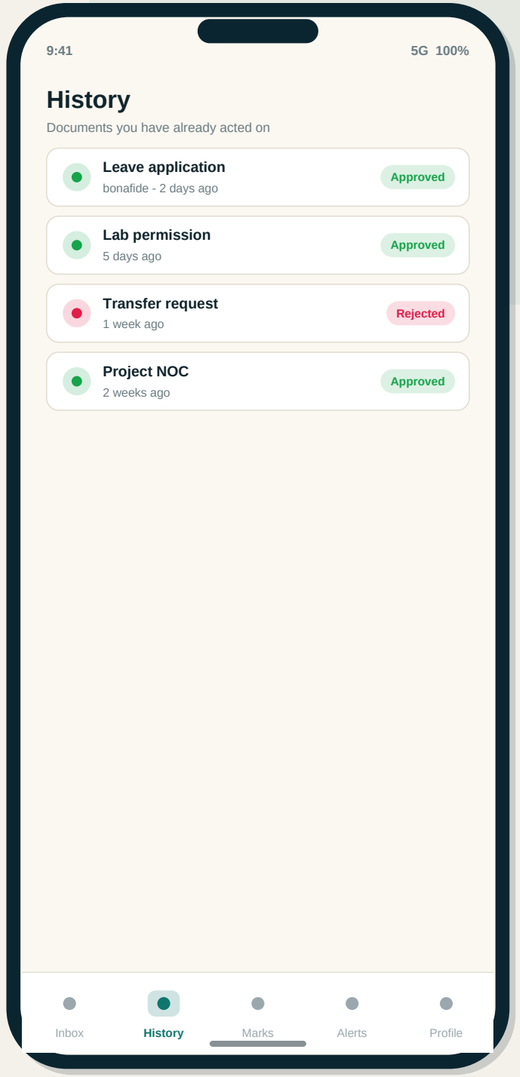

A record of everything the authority has approved or rejected.

- **Approved / rejected badges**
- **Newest first**
- **Searchable**

WEB

APP

ApproveHub

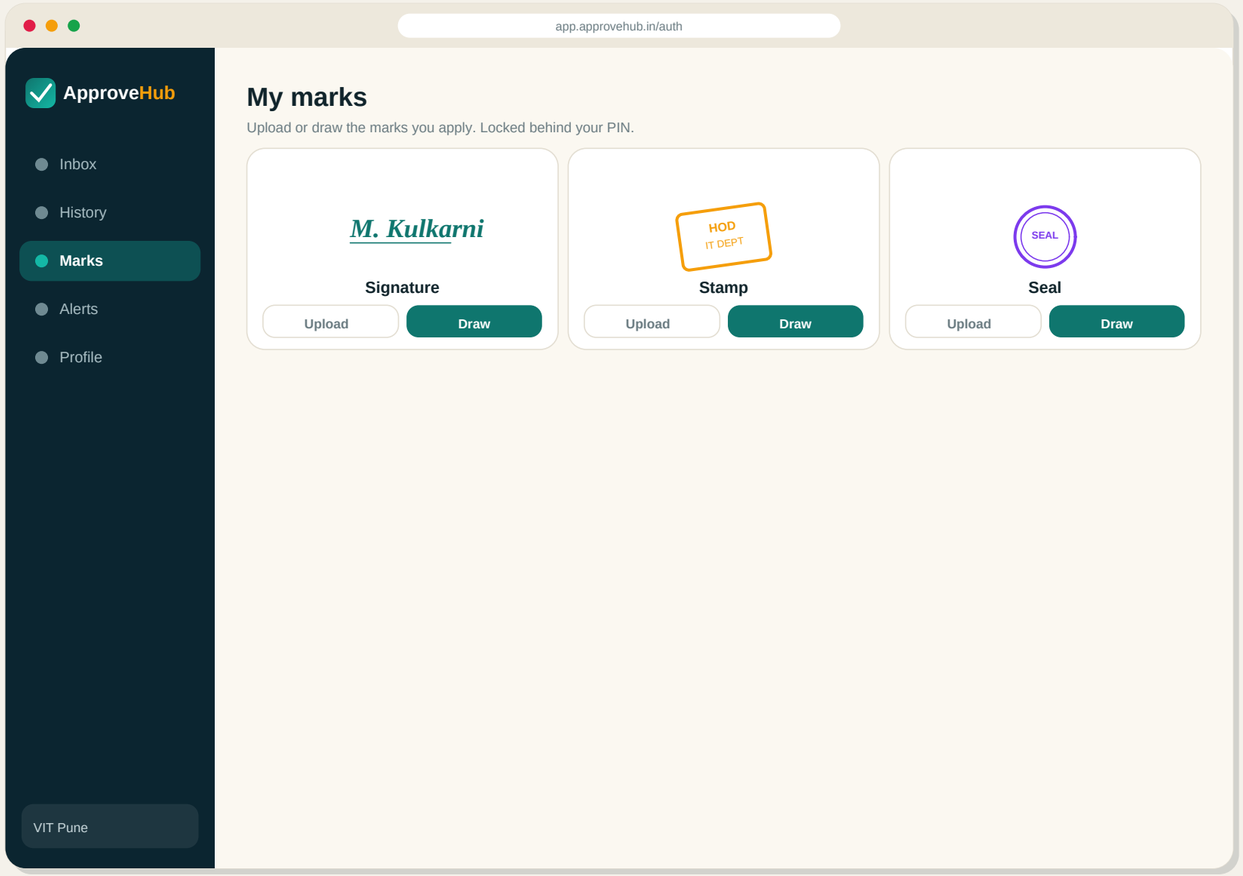

AUTHORITY

My marks

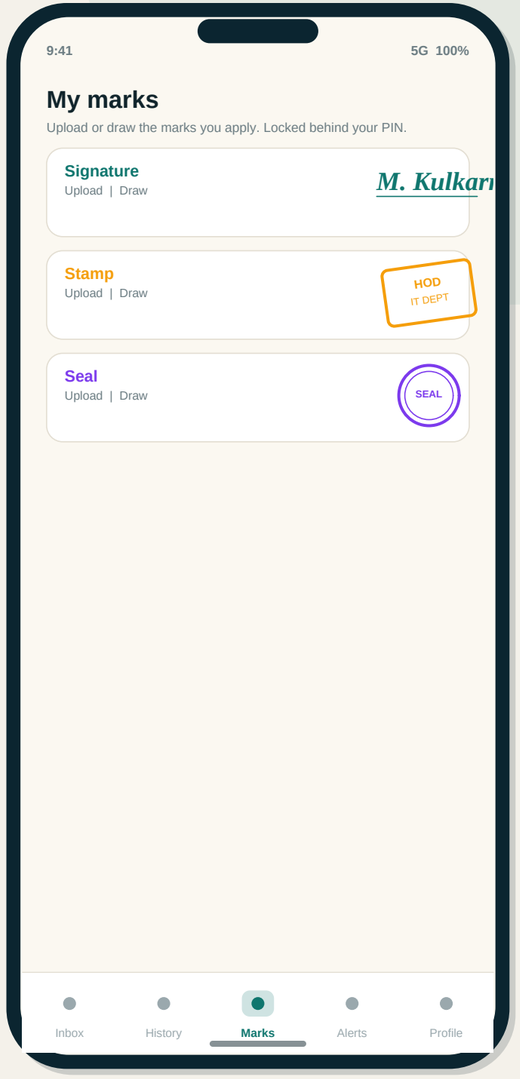

Each authority stores their signature, stamp and seal here. Marks are only applied after PIN confirmation.

- **Upload or draw**
- **Three mark types**
- **PIN protected**

WEB

APP

ApproveHub

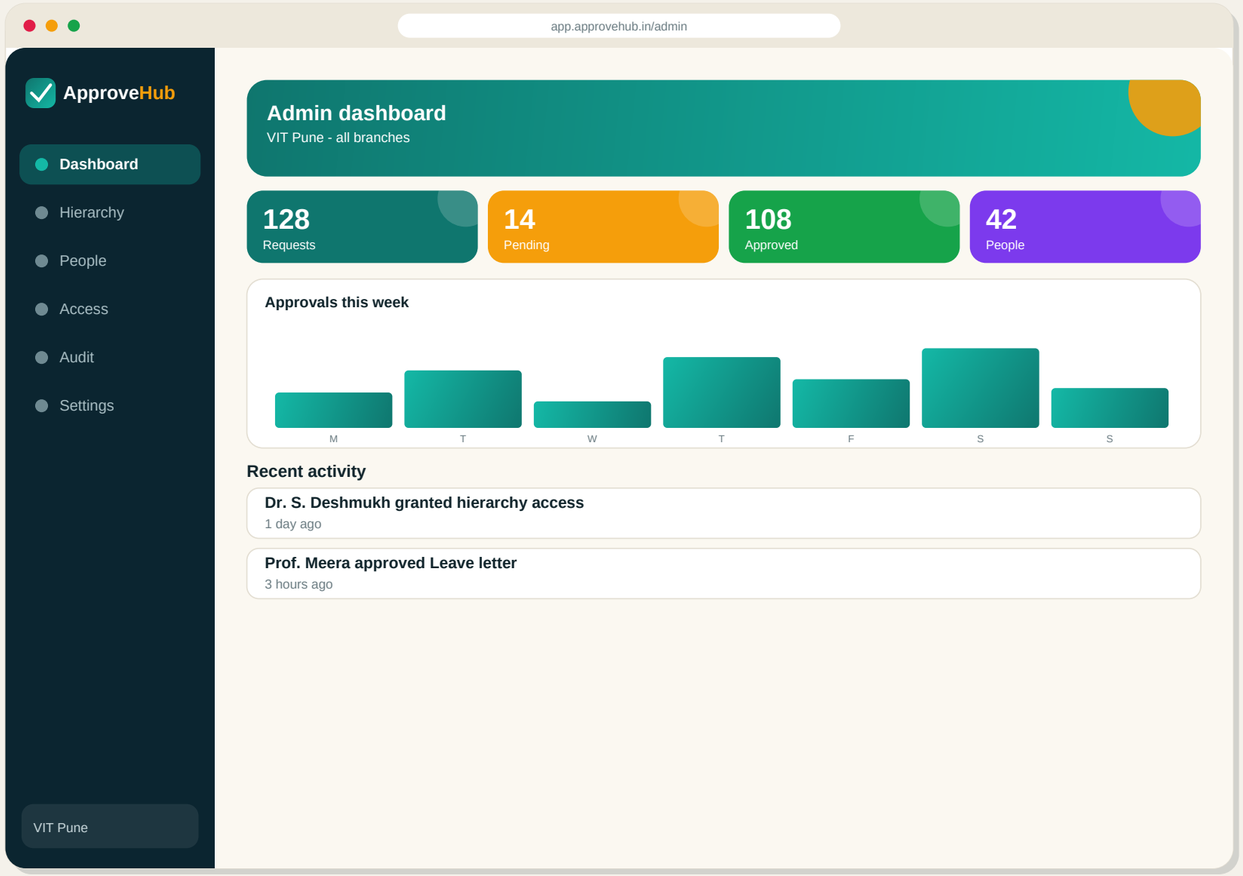

ADMIN

Dashboard

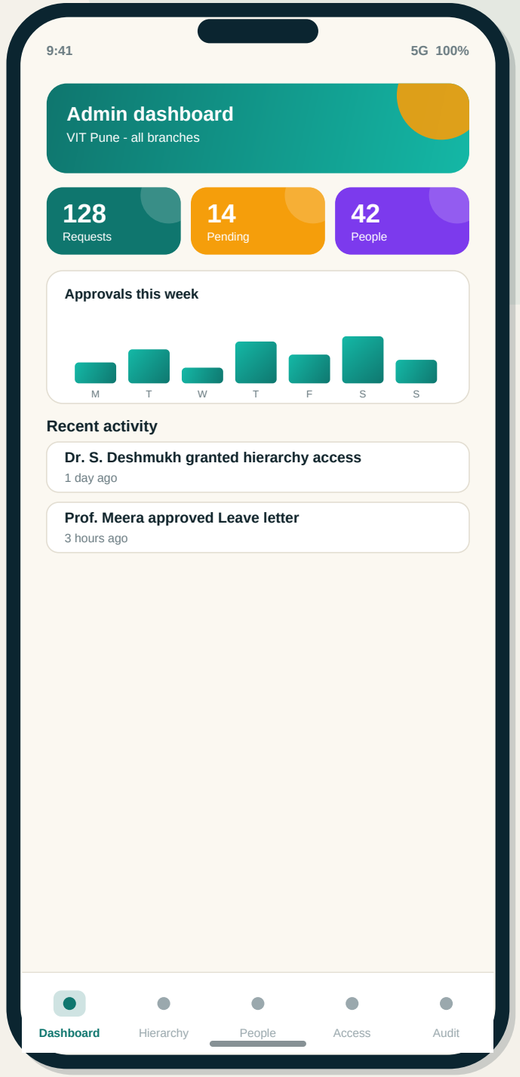

Admins see request volume, pending approvals and recent activity for their institution.

- **Stat tiles**
- **Weekly chart**
- **Activity feed**

WEB

APP

ApproveHub

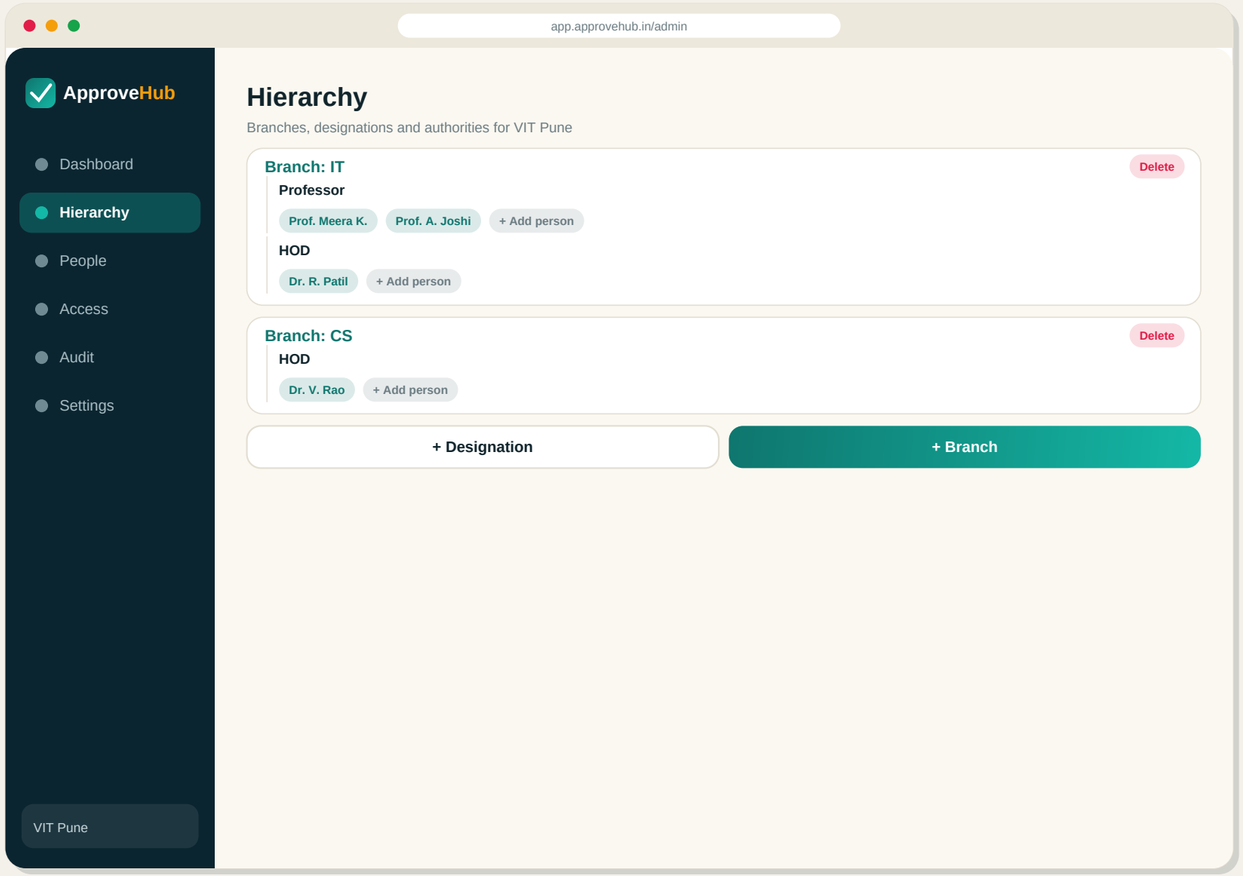

ADMIN

Hierarchy builder

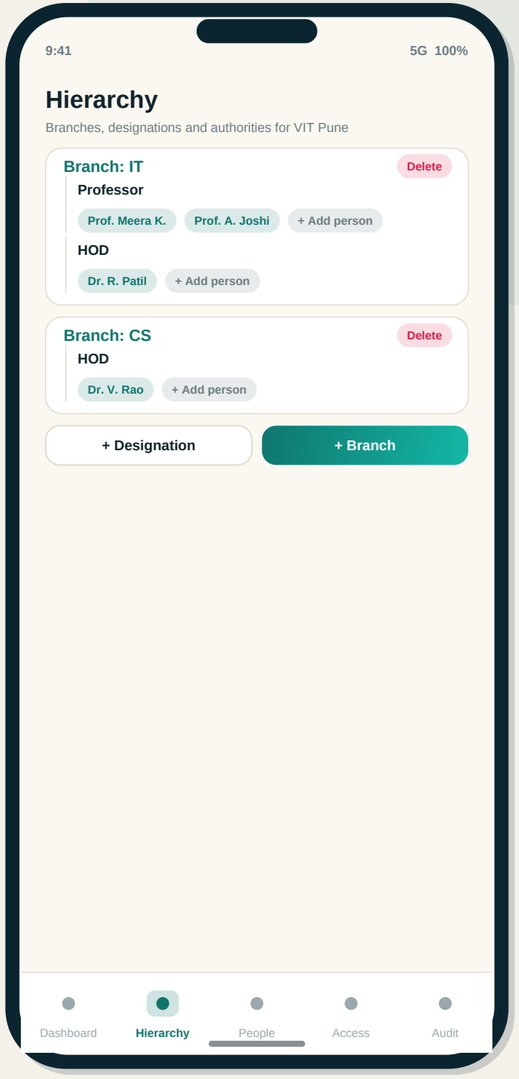

Each institution defines its own branches, designations and the people in them. The user's dropdowns are built from this.

- **Branch > Designation > Person**
- **Add or remove at any level**
- **Per-institution**

WEB

APP

ApproveHub

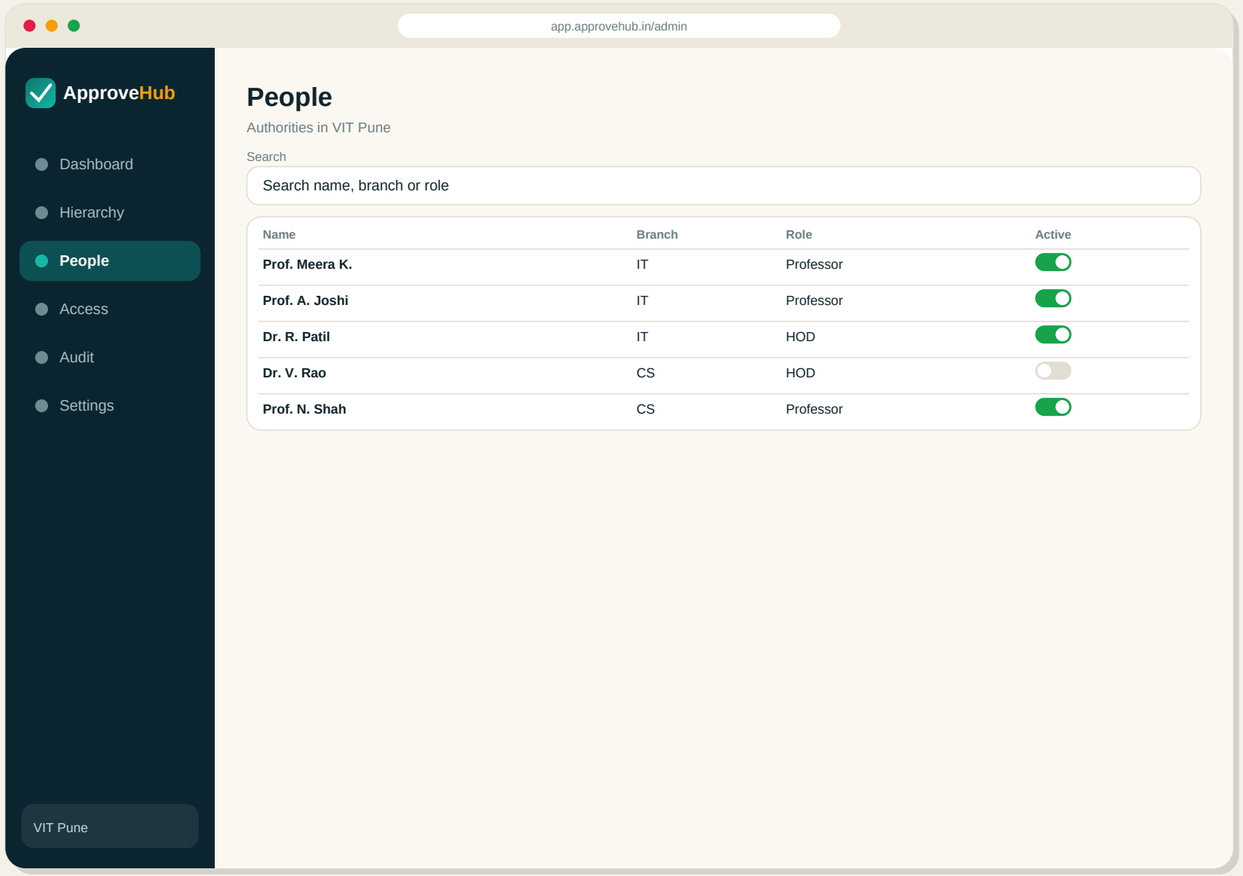

ADMIN

People

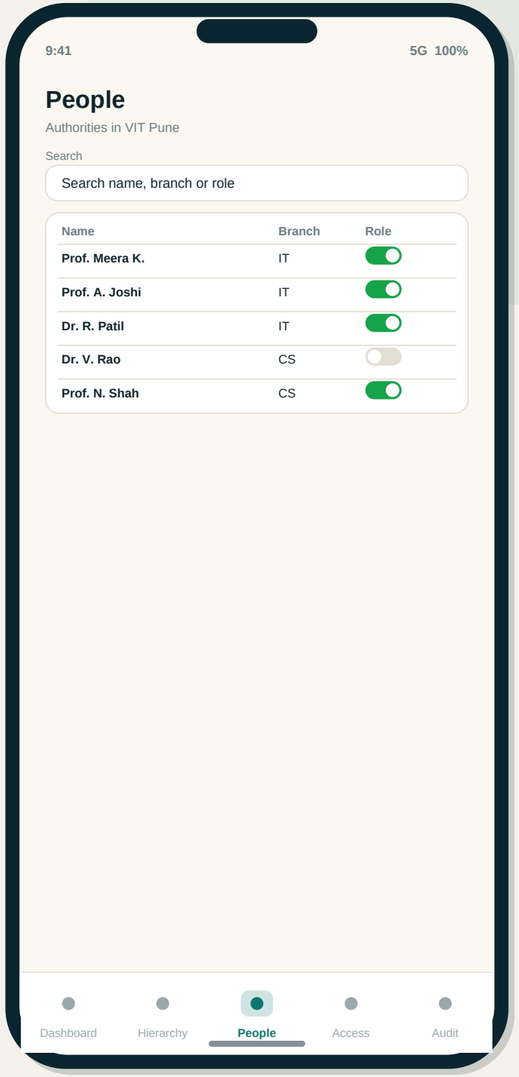

Search and enable or disable authorities.

- **Search**
- **Active toggle**
- **Branch and role**

WEB

APP

ApproveHub

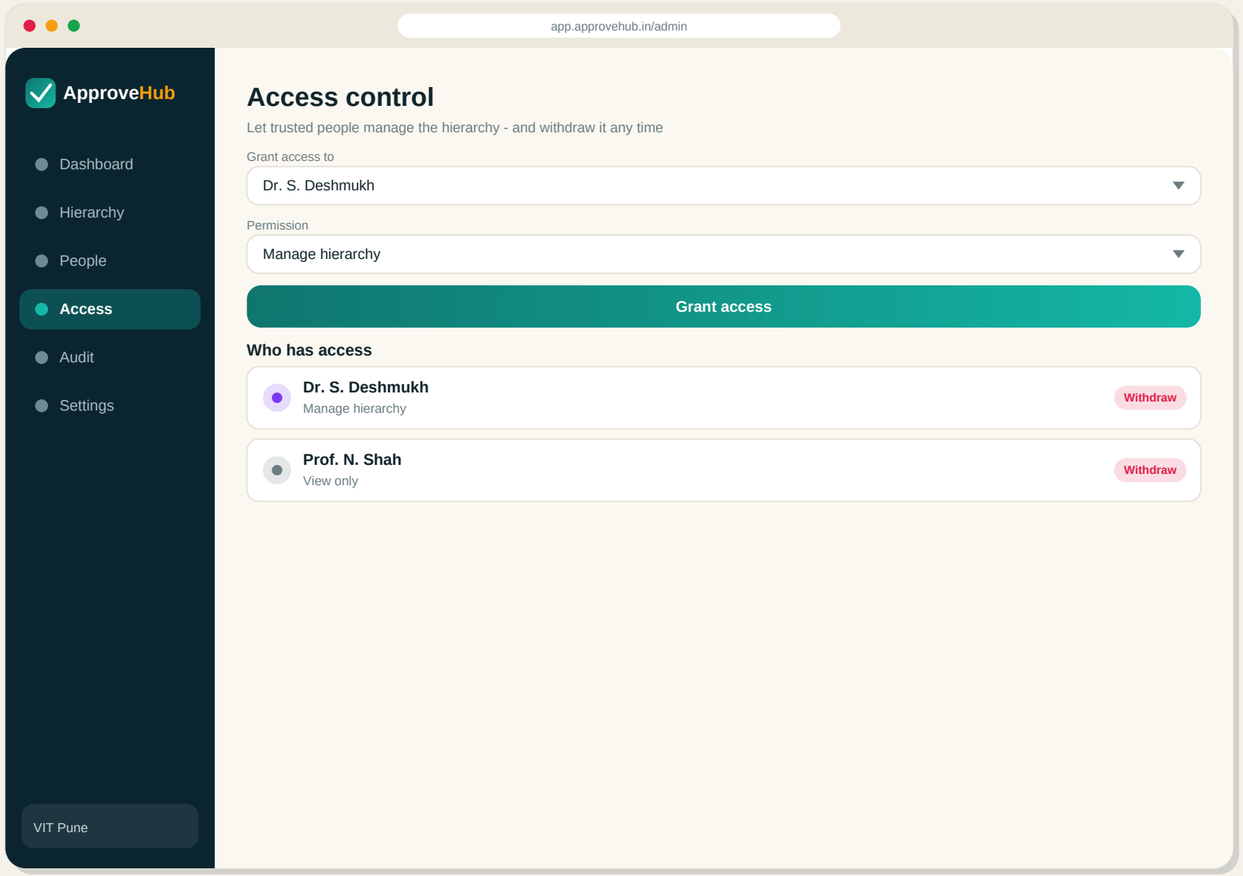

ADMIN

Access control

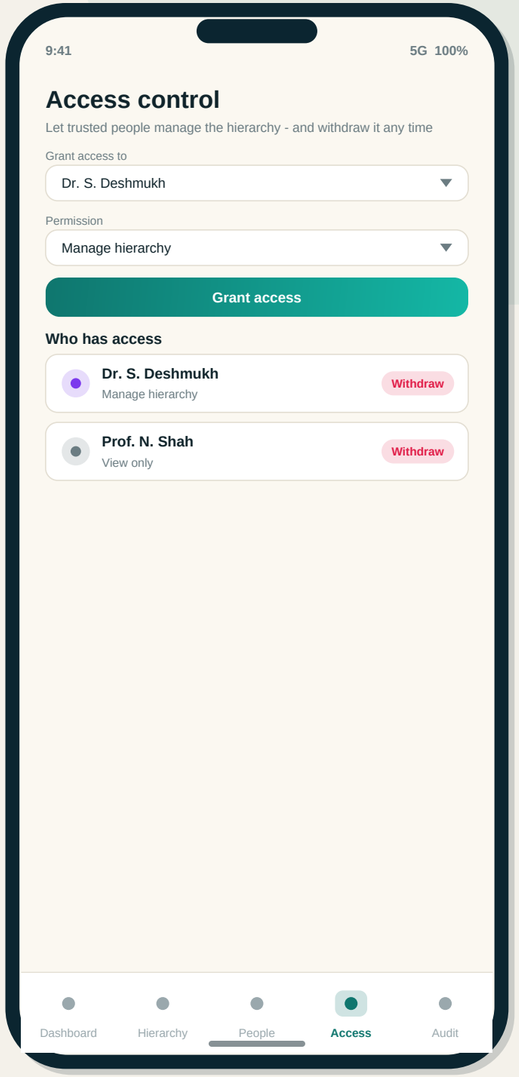

The admin can hand hierarchy-management rights to anyone, choose the permission level, and withdraw it at any time.

- **Grant to any person**
- **Permission levels**
- **One-tap withdraw**

WEB

APP

ApproveHub

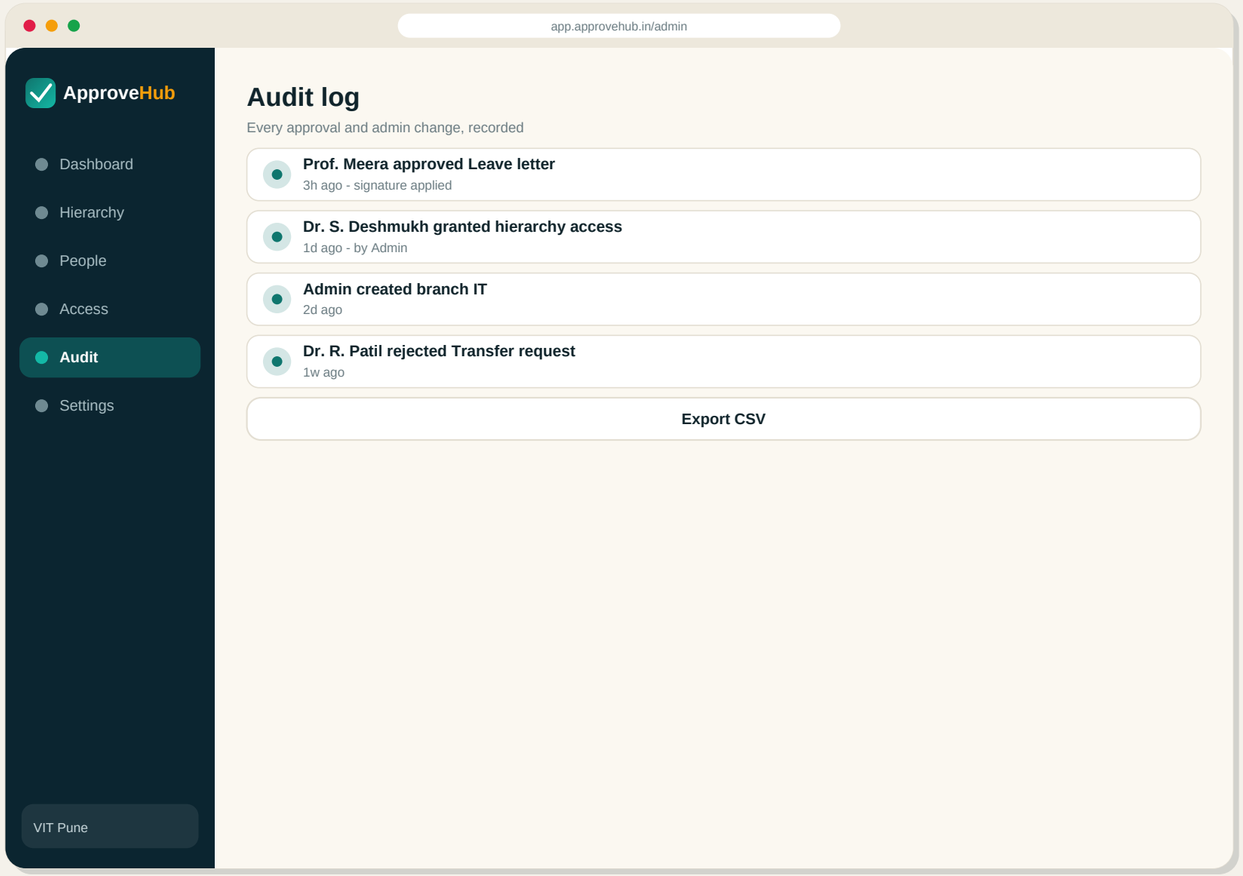

ADMIN

Audit log

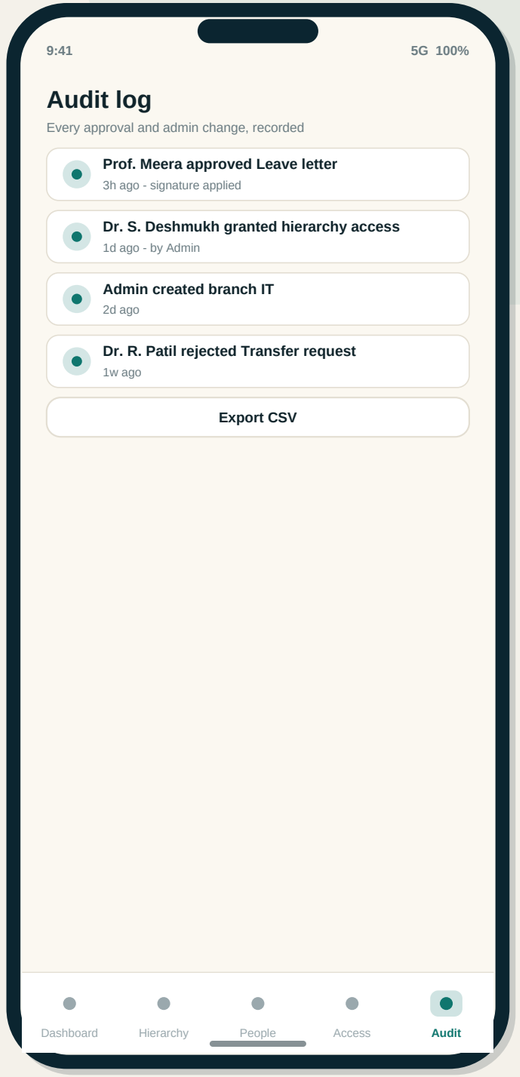

Every approval, rejection and admin change is recorded and can be exported.

- **Who, what, when**
- **Export CSV**
- **Tamper-evident**

WEB

APP

ApproveHub

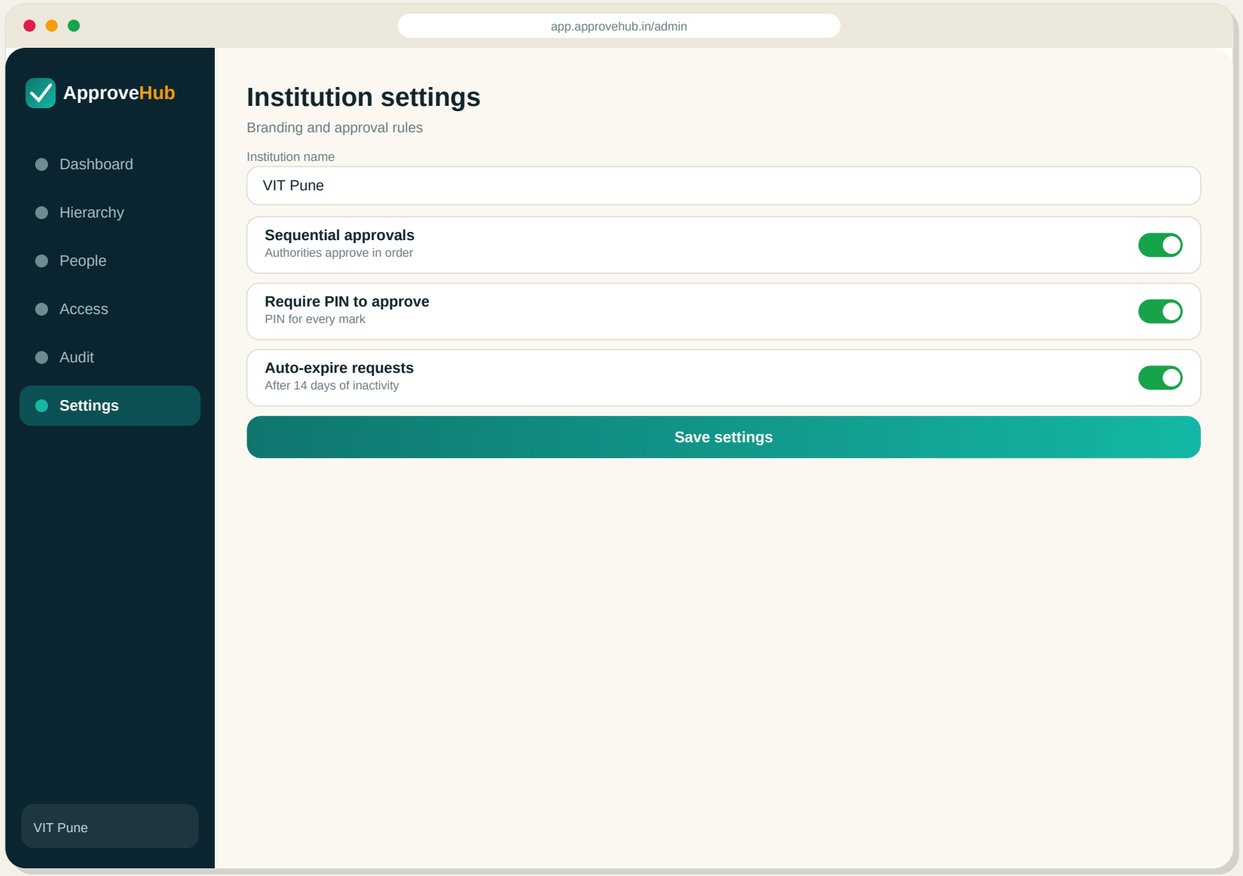

ADMIN

Institution settings

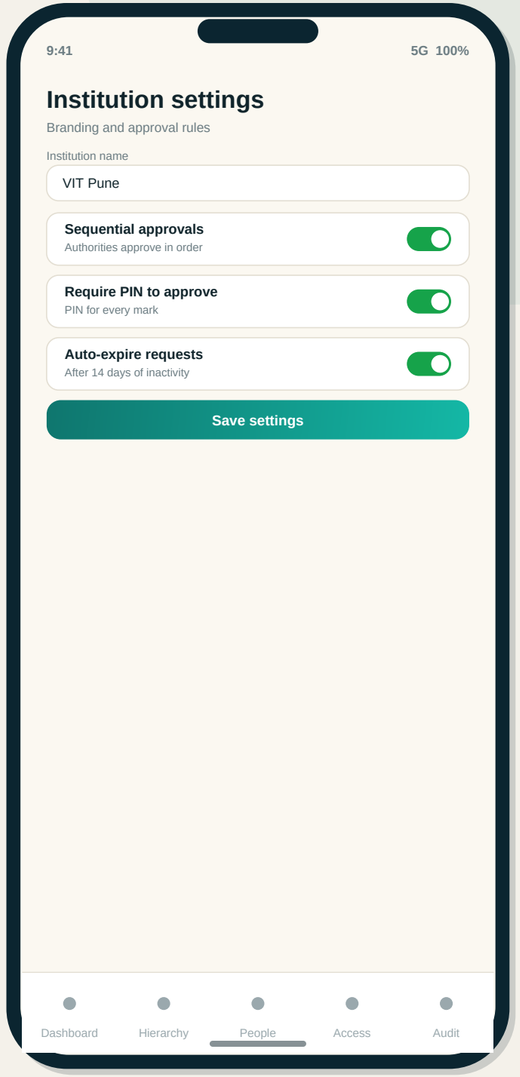

Name, logo and approval rules for the institution.

- **Sequential approvals**
- **PIN required to approve**
- **Auto-expiry**
